

Kedarnath Yatra Workers Survey: Final Questionnaire and Variable List

Version 2, worked example. Read-aloud interview, tablet-based, one visit, 45 minutes at most

What this is. The final list of questions and variables for the survey of Yatra workers. The main aim is to measure **vulnerability to poverty** (VEP and multidimensional poverty). A short employment-quality block and a short tasks block are added. The tasks block only gathers the facts the later paper on job transfer needs. There are **216 asked questions**, 9 recorded automatically or by the enumerator, and 129 variables built afterwards in Stata. The companion file `variable_dictionary.csv` lists everything in one table.

1. Rules the questions follow

- **No rating questions.** Every answer is a fact: yes or no, a count, an amount, or a choice from a card. Nobody is asked to score anything on a scale.
- **Aggregate household questions**, no household roster. The respondent is the worker. Consumption is for the household's usual place of living.
- **Codes.** 98 = prefers not to say (schooling, ropeway view). 97 = don't know (job-quality questions). Blank = the question was skipped by a rule shown in the table.
- **Recall.** 30 days for frequent spending, 12 months for infrequent spending, health, income and shocks, 15 days for recent illness.
- Questions are read aloud in Hindi, Garhwali or Nepali. Cards are used for long answer lists.

2. Time budget

Interview length is NOT estimated here. The module list below gives item counts only; the pretest measures real durations from the tablet's own start and end timestamps.

Module	Name	Items	Minutes
P	Cover page, consent and paradata	9	
A	Respondent and household	17	
B	Work and work history	16	
C	Monthly calendar of work and income; remittances	34	
D	Migration	18	
E	Household consumption	27	
F	Housing, amenities and assets	29	
G	Finance, insurance and schemes	18	
H	Health	10	
I	Food security, shocks and coping	15	
J	Ropeway	2	
K	Job quality (Apablaza et al. 2026 questions)	13	
L	Tasks and skills (short block)	17	
	Total	225	

Interview length is measured from the tablet's own start and end timestamps at the pretest; no estimate is claimed here. With 4 enumerators at 5 to 8 interviews a day, one round of about 10 days gives roughly 200 to 320 interviews.

3. Consent script (read before Module A)

"We are doing a study on the livelihoods of people who work on the Yatra route. It takes about 40 minutes. You can stop at any time and you can skip any question. Nothing you say will be linked to your name. Do you agree to take part?" Record consent (variable `consent`); stop the interview if the answer is no.

Module P: Cover page, consent and paradata

Read this out, word for word:

We are doing a study on the livelihoods of people who work on the Yatra route. I would like to ask you some questions about your work, your household and your spending.

Taking part is your choice. You can stop at any time, and you can skip any question you do not want to answer. Nothing you tell me will be linked to your name, and nothing you say will affect your work here or any government benefit.

No.	Question or instruction	Answers	Variable, skip rule, source
P1	Assigned by the tablet.	Automatic / enumerator	resp_id Source: Design
P2	Which enumerator is doing this interview? (Select your own name before you approach anyone.)	Automatic / enumerator	enum_id Source: Design
P3	Which route is this interview on?	Automatic / enumerator	site Source: Project design (two-route stratification)
P4	Recorded automatically.	Automatic / enumerator	interview_date Source: Design
P5	Recorded automatically.	Automatic / enumerator	gps_lat Source: Design
P6	Recorded automatically.	Automatic / enumerator	gps_lon Source: Design
P7	Do you agree to take part?	Automatic / enumerator	consent Source: Design
P8	Recorded automatically (start to end).	Automatic / enumerator	interview_duration_min Source: Design
P9	Recorded automatically (module timestamps).	Automatic / enumerator	dur_tasks_min Source: Design

Module A: Respondent and household

Read aloud: First, a few things about you and the people who live in your household.

No.	Question or instruction	Answers	Variable, skip rule, source
A1	How old are you? (completed years)	Number	age Source: Standard; sensitivity covariate in the VEP model (Azeem et al. 2016 structure)
A2	Record sex; ask if unsure: are you male or female?	0 Male; 1 Female	female Source: Standard household-survey item
A3	Who is the head of your household – is it you, or someone else? If someone else, how are they related to you?	1 Self (respondent is the head); 2 Husband; 3 Wife; 4 Father; 5 Mother; 6 Son; 7 Daughter; 8 Brother; 9 Sister; 10 Other male relative; 11 Other female relative; 12 Other, non-relative (male); 13 Other, non-relative (female)	hoh_relation Source: Standard household-survey item
A4	What is your native language, the language you first learned at home?	1 Garhwali; 2 Kumaoni; 3 Hindi; 4 Nepali; 5 Bhojpur; 6 Assamese; 7 Bengali; 8 Bodo; 9 Dogri; 10 Gujarati; 11 Kannada; 12 Kashmiri; 13 Konkani; 14 Maithili; 15 Malayalam; 16 Manipuri (Meitei); 17 Marathi; 18 Odia; 19 Punjabi; 20 Sanskrit; 21 Santali; 22 Sindhi; 23 Tamil; 24 Telugu; 25 Urdu; 96 Other Indian language; 97 Other / foreign language	native_language Source: Project design (language proxy for regional/socioeconomic origin; avoids a sensitive caste question and covers out-of-country migrants)
A5	Which language is it? Write down exactly what they say.		native_language_other <i>Skip: Ask only if native_language is 96 (other Indian language) or 97 (other / foreign language)</i> Source: Project design (the language item stands in for caste; an uncoded 'other' is a real loss)
A6	Are you currently married, never married, or widowed/divorced/separated?	1 Currently married; 2 Never married; 3 Widowed/divorced/separated	marital_status Source: Standard household-survey item
A7	Do you know exactly how many years of schooling you completed, counting from class 1?	1 Yes, 0 No	knows_years_schooling Source: Standard household-survey item

No.	Question or instruction	Answers	Variable, skip rule, source
A8	How many years of schooling did you complete in total? (0 if none)	Whole number	years_schooling <i>Skip: Ask only if knows_years_schooling = 1</i> Source: NITI Aayog National MPI (years of schooling); Chaudhuri et al. 2002 covariate
A9	Which is closest: no formal education; some schooling but did not finish primary; finished primary but not secondary; or finished secondary or higher?	1 No formal education; 2 Some schooling, did not complete primary; 3 Completed primary but not secondary; 4 Completed secondary or higher; 98 Prefer not to say	education_level_cat <i>Skip: Ask only if knows_years_schooling = 0</i> Source: NITI Aayog National MPI (years of schooling); Chaudhuri et al. 2002 covariate
A10	How many members live in your household, including you?	Whole number	hhszise Source: Chaudhuri et al. 2002; used to get per-capita consumption
A11	Counting everyone in your household aged 10 or above, has at least one of them finished six years of schooling or more?	1 Yes, 0 No	any_member_6yr_schooling Source: NITI Aayog National MPI, Years of Schooling (weight 1/6)
A12	Is your family nuclear – just you, your spouse and unmarried children – or joint, living with parents, married siblings or other extended family? (Say single-member if you live alone.)	1 Nuclear (you, spouse and unmarried children only); 2 Joint (living with parents, married siblings or other extended family); 3 Single-member household	family_structure Source: Standard household-survey item
A13	How many of them, including you, earn money?	Whole number	n_earners Source: Dependency measure used in VEP studies (Azeem et al. 2016)
A14	Among those who earn money, are you the main income earner in your household?	1 Yes, 0 No	main_income_earner <i>Skip: Ask only if n_earners ≥ 1 (if the respondent is the only earner, this is automatic)</i> Source: Apablaza et al. 2026, Appendix 2 Q4 (adapted to a single-respondent report: 'who is the main contributor' becomes 'are you the main contributor')
A15	How many of them are children under 15?	Whole number	n_children_u15 Source: Adult-equivalent scales (Claro et al. 2010; Awuni et al. 2023)
A16	How many of them are children aged 6 to 14?	Whole number	n_children_6_14 Source: NITI Aayog National MPI school-attendance indicator
A17	How many of these children do not go to school now?	Whole number	n_children_out_school <i>Skip: Ask only if n_children_6_14 ≥ 0</i> Source: NITI Aayog National MPI school-attendance indicator

Module B: Work and work history

Read aloud: Now about the work you do here on the Yatra route, and the work you did before this.

No.	Question or instruction	Answers	Variable, skip rule, source
B1	What is your main work during the Yatra season? Ask what they do and code the closest group; do not read the list aloud unless needed.	1 Pony/mule worker (works the animals, does not own them); 2 Pony/mule owner (owns the animals); 3 Porter (carries on own back/shoulders - goods, luggage, or a person in a kandi); 4 Palki / dandi bearer (carries a person on a palanquin, as part of a team); 5 Dhaba, tea stall or food stall WORKER (prepared food or tea); 6 Dhaba, tea stall or food stall OWNER (prepared food or tea); 7 Shop WORKER (goods: prasad, puja items, clothes, general store); 8 Shop OWNER (goods, not prepared food); 9 Hotel / lodge WORKER; 10 Hotel / lodge OWNER; 11 Driver (any motor vehicle); 12 Guide; 13 Wage labourer (construction, loading, odd jobs); 14 Other	occupation Source: Project quota design, mapped to NCO-2015 families
B2	In your own words, what exactly is your main work here? Write down what they say – what they actually do, and who for. Do not tick a box for this one.		occupation_detail Source: Project design (coarse quota group + verbatim detail, coded to NCO-2015 in the office)

No.	Question or instruction	Answers	Variable, skip rule, source
B3	In this main work, are you: working on your own account without hired workers; running a business with hired workers; a regular monthly wage-earner; or a daily/casual wage-earner?	1 Own-account (self-employed, no hired workers); 2 Employer/business owner (self-employed); 3 Regular wage or salary; 4 Casual or daily wage labourer; 5 Unpaid family worker	employment_type Source: PLFS / NSS employment status classification [source not held by this project; citation unverified as of 2026-09-28]
B4	Besides your main work, how many OTHER paid activities or income-generating activities do you have? (0 if none. For example, a shop owner who also rents out a pony and drives in the off-season would say 2.)	Whole number	n_other_activities Source: Project design (multiple job-holding, common in the Yatra economy)
B5	Which ones are they? Check every one that applies. Ask and code the closest group for each; do not read the list aloud unless needed.	1 Pony/mule worker (works the animals, does not own them); 2 Pony/mule owner (owns the animals); 3 Porter (carries on own back/shoulders - goods, luggage, or a person in a kandi); 4 Palki / dandi bearer (carries a person on a palanquin, as part of a team); 5 Dhaba, tea stall or food stall WORKER (prepared food or tea); 6 Dhaba, tea stall or food stall OWNER (prepared food or tea); 7 Shop WORKER (goods: prasad, puja items, clothes, general store); 8 Shop OWNER (goods, not prepared food); 9 Hotel / lodge WORKER; 10 Hotel / lodge OWNER; 11 Driver (any motor vehicle); 12 Guide; 13 Wage labourer (construction, loading, odd jobs); 14 Other	other_activity_types <i>Skip: Ask only if n_other_activities $\neq$ 0</i> Source: Project design (multiple job-holding, common in the Yatra economy)
B6	Taking all of that other work together, about how much do you usually earn from it in a month? (Rs)	Rupees (whole number)	other_activity_income_pm <i>Skip: Ask only if n_other_activities $\neq$ 0</i> Source: Project design (multiple job-holding)
B7	How many Yatra seasons have you worked in this kind of work?	Whole number	years_in_yatra_work Source: Chaudhuri et al. 2002 sensitivity covariate; Apablaza et al. 2026 Q10 (tenure in this job)
B8	In the Yatra season, on a normal working day, how many hours do you work in total, across all your work?	Whole number	hours_day_yatra Source: Apablaza et al. 2026 Q13 (decomposed into hours/day x days/week rather than asked as one weekly figure, for ease of recall)
B9	How many days a week do you usually work in the season?	Whole number	days_week_yatra Source: Apablaza et al. 2026 Q13 (decomposed into hours/day x days/week rather than asked as one weekly figure, for ease of recall)
B10	In the last ten years, did you change your main kind of work?	1 Yes, 0 No	prev_occ_change Source: Occupational mobility check; job-history item
B11	What was your previous main work? Write down exactly what they say, in their words – do not pick from a list.		prev_occ <i>Skip: Ask only if prev_occ_change = 1</i> Source: Gathmann and Schonberg 2010 (observed moves are systematically shorter than random moves – the validation test for a task-distance measure); coded to NCO-2015 in the office
B12	If you could not continue this work at all, what work would you move to instead? Write down exactly what they say, in their words – do not pick from a list, and do not prompt with examples.		target_occ Source: Project design (stated destination, for the structural-displacement analysis); coded to NCO-2015 in the office
B13	What was the main reason you changed?	1 Better income; 2 Lost the previous work; 3 Work ended with the season; 4 Family reasons; 5 Health or injury; 6 Other	prev_occ_reason <i>Skip: Ask only if prev_occ_change = 1</i> Source: Job-history item
B14	Apart from school and college, have you ever completed any training course or apprenticeship?	1 Yes, 0 No	training_received Source: STEP module 2; Chaudhuri et al. 2002 adaptive-capacity covariate
B15	What kind of course or training was it?	1 ITI or other trade course; 2 Hotel, catering or tourism; 3 Driving; 4 Mobile, computer or electrical repair; 5 Tailoring or handicraft; 6 Animal handling or veterinary; 7 Construction trade (mason, carpenter, plumber); 8 Health or first aid; 9 Other	training_type <i>Skip: Ask only if training_received = 1</i> Source: STEP module 2
B16	What was it? Write what they say.		training_type_other <i>Skip: Ask only if training_type = 9 (Other); may be left blank</i> Source: STEP module 2

Module C: Monthly calendar of work and income; remittances

Read aloud: Now I want to go through the last twelve months, one month at a time. For each month I will ask what work you were mainly doing and where you were living, and then what you usually earned. It is easiest to start with the Yatra months and fill the rest afterwards.

No.	Question or instruction	Answers	Variable, skip rule, source
C1	In May, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m5 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C2	In June, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m6 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C3	In July, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m7 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C4	In August, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m8 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C5	In September, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m9 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C6	In October, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m10 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C7	In November, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m11 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C8	In December, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m12 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C9	In January, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m1 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)

No.	Question or instruction	Answers	Variable, skip rule, source
C10	In February, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m2 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C11	In March, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m3 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C12	In April, what was your main work or activity?	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work	status_m4 Source: Monthly work calendar; seasonality of consumption and poverty per Dercon and Krishnan 2000 (their design is a three-round panel, not a monthly recall calendar – the calendar format is project design)
C13	Can you tell me roughly what you earned in each month of the past year, or would it be easier to give one total for the whole year?	1 Month by month; 0 One total for the whole year	knows_monthly_income Source: Apablaza et al. 2026 Q14/Q15 (the 'does not know' route out of monthly earnings)
C14	How much did you earn from all your work in January, after costs? (Rs)	Rupees (whole number)	income_m1 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m1 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C15	How much did you earn from all your work in February, after costs? (Rs)	Rupees (whole number)	income_m2 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m2 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C16	How much did you earn from all your work in March, after costs? (Rs)	Rupees (whole number)	income_m3 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m3 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C17	How much did you earn from all your work in April, after costs? (Rs)	Rupees (whole number)	income_m4 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m4 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C18	How much did you earn from all your work in May, after costs? (Rs)	Rupees (whole number)	income_m5 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m5 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C19	How much did you earn from all your work in June, after costs? (Rs)	Rupees (whole number)	income_m6 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m6 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C20	How much did you earn from all your work in July, after costs? (Rs)	Rupees (whole number)	income_m7 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m7 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C21	How much did you earn from all your work in August, after costs? (Rs)	Rupees (whole number)	income_m8 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m8 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C22	How much did you earn from all your work in September, after costs? (Rs)	Rupees (whole number)	income_m9 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m9 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C23	How much did you earn from all your work in October, after costs? (Rs)	Rupees (whole number)	income_m10 <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m10 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure

No.	Question or instruction	Answers	Variable, skip rule, source
C24	How much did you earn from all your work in November, after costs? (Rs)	Rupees (whole number)	<code>income_m11</code> <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m11 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C25	How much did you earn from all your work in December, after costs? (Rs)	Rupees (whole number)	<code>income_m12</code> <i>Skip: Ask only if knows_monthly_income = 1; automatic 0 if status_m12 = 8 (no paid work)</i> Source: Apablaza et al. 2026 Q14 (monthly earnings), asked month by month to avoid heaping on one typical figure
C26	Thinking of the whole past year, about how much did you earn in total from all your work, after costs? (Rs)	Rupees (whole number)	<code>income_annual_total</code> <i>Skip: Ask only if knows_monthly_income = 0</i> Source: Apablaza et al. 2026 Q15 (fallback when monthly earnings are not known), adapted to an annual total for a seasonal workforce
C27	Out of every 100 rupees you earned in the whole year, how many came from your Yatra work? (The rest is counted as coming from your other work.)	Whole number	<code>pct_income_yatra</code> <i>Skip: Ask only if knows_monthly_income = 0</i> Source: Project design (the Yatra / non-Yatra split needed to reweight an annual total onto the work calendar)
C28	In a normal month during the Yatra season, how much money do you usually send to family or others living elsewhere? (Rs, 0 if none)	Rupees (whole number)	<code>remit_out_yatra_pm</code> Source: Project design (amount only; frequency dropped for length). A previous citation to NSS 64th Round practice was withdrawn 2026-09-28: no NSS schedule is held by this project and it could not be checked
C29	In a normal month when the Yatra is closed, how much do you usually send? (Rs, 0 if none)	Rupees (whole number)	<code>remit_out_offseason_pm</code> Source: Project design (amount only; frequency dropped for length). A previous citation to NSS 64th Round practice was withdrawn 2026-09-28: no NSS schedule is held by this project and it could not be checked
C30	How do you usually send it?	1 From my own phone (UPI or net banking); 2 In person at a bank branch or bank mitra / CSP; 3 Money order or post office; 4 Sent with someone going home; 5 Carried it myself; 6 Through an agent or middleman; 7 Other	<code>remit_mode</code> <i>Skip: Ask only if remit_out_yatra_pm ≠ 0 or remit_out_offseason_pm ≠ 0</i> Source: Project design (remittance channel as a financial-inclusion and cost measure)
C31	In a normal month during the Yatra season, how much money do you usually receive from family or others? (Rs, 0 if none)	Rupees (whole number)	<code>remit_in_yatra_pm</code> Source: Project design (amount only; frequency dropped for length). A previous citation to NSS 64th Round practice was withdrawn 2026-09-28: no NSS schedule is held by this project and it could not be checked
C32	In a normal month when the Yatra is closed, how much do you usually receive? (Rs, 0 if none)	Rupees (whole number)	<code>remit_in_offseason_pm</code> Source: Project design (amount only; frequency dropped for length). A previous citation to NSS 64th Round practice was withdrawn 2026-09-28: no NSS schedule is held by this project and it could not be checked
C33	In the months when the Yatra is closed and you are doing other work, on a normal working day, how many hours do you work in total?	Whole number	<code>hours_day_offseason</code> <i>Skip: Ask only if any month in the calendar is other paid work (status 2 to 7)</i> Source: Apablaza et al. 2026 Q13, asked a second time for the off-season (decomposed as hours/day x days/week, as in the Yatra-season pair)
C34	In those months, how many days a week do you usually work?	Whole number	<code>days_week_offseason</code> <i>Skip: Ask only if any month in the calendar is other paid work (status 2 to 7)</i> Source: Apablaza et al. 2026 Q13, asked a second time for the off-season

Module D: Migration

Read aloud: Now a few questions about where your home is, and what you do when the Yatra closes for the season.

No.	Question or instruction	Answers	Variable, skip rule, source
D1	Where is your permanent home?	1 Local (same district); 2 Other Uttarakhand district; 3 Other Indian state; 4 Nepal	<code>origin</code> Source: Project design (distance bucket); NOT an NSS classification – the earlier citation to one was withdrawn 2026-09-28, no NSS schedule is held by this project

No.	Question or instruction	Answers	Variable, skip rule, source
D2	Which state is your permanent home in? (If it is outside India, say so.)	1 Andhra Pradesh; 2 Arunachal Pradesh; 3 Assam; 4 Bihar; 5 Chhattisgarh; 6 Goa; 7 Gujarat; 8 Haryana; 9 Himachal Pradesh; 10 Jharkhand; 11 Karnataka; 12 Kerala; 13 Madhya Pradesh; 14 Maharashtra; 15 Manipur; 16 Meghalaya; 17 Mizoram; 18 Nagaland; 19 Odisha; 20 Punjab; 21 Rajasthan; 22 Sikkim; 23 Tamil Nadu; 24 Telangana; 25 Tripura; 26 Uttar Pradesh; 27 Uttarakhand; 28 West Bengal; 29 Andaman and Nicobar Islands; 30 Chandigarh; 31 Dadra and Nagar Haveli and Daman and Diu; 32 Delhi; 33 Jammu and Kashmir; 34 Ladakh; 35 Lakshadweep; 36 Puducherry; 99 Outside India	home.state Source: Standard state/UT classification; needed to apply the right poverty line per respondent
D3	Is that home in a village, or in a town or city?	1 Village (rural); 2 Town or city (urban)	home.rural.urban Source: Rural and urban poverty lines (Sethu et al. 2024)
D4	When the Yatra closes for the season, do YOU go to your home place?	1 Yes, 0 No	resp_returns_at_closure Source: Project design; categories from the pilot's own residency_pattern distribution (n=46)
D5	And do the rest of your household live at your home place all year, or are they here with you during the season?	1 Yes, 0 No	hh_at_home_place Source: Project design (split-household measurement, underpinning Module E)
D6	During the Yatra season, how many people are you feeding and spending on here, counting yourself?	Whole number	n_here_season <i>Skip: Ask only if hh_at_home_place = 1</i> Source: Project design (season-specific denominator for per-capita consumption)
D7	How many years have you been coming here for the Yatra season?	Whole number	years_coming_here <i>Skip: Ask only if resp_returns_at_closure = 1</i> Source: Project design (duration of the seasonal relationship)
D8	What was the main reason you first came here to work?	1 No work at home; 2 Pay is better here; 3 Family or people from my village were already here; 4 Land at home is too little to live on; 5 Debt to repay; 6 A contractor or agent brought me; 7 Married into / moved with family; 8 Some other reason	came_here_reason <i>Skip: Ask only if origin is not Local (same district)</i> Source: Project design (push/pull as a vulnerability covariate)
D9	Last year, in the months when the Yatra was closed, did you go somewhere else for work?	1 Yes, 0 No	worked_away_in_closure Source: Project design (off-season labour migration)
D10	Where did you go, and what work did you do there? Write what they say.		closure_work_detail <i>Skip: Ask only if worked_away_in_closure = 1; may be left blank</i> Source: Project design; coded to NCO-2015 in the office
D11	In the past year, which month did you last leave here and go to your home place?	1 January; 2 February; 3 March; 4 April; 5 May; 6 June; 7 July; 8 August; 9 September; 10 October; 11 November; 12 December	left_here_month <i>Skip: Ask only if resp_returns_at_closure = 1</i> Source: Project design (measured seasonal base, asked as a spell)
D12	And which month did you come back here?	1 January; 2 February; 3 March; 4 April; 5 May; 6 June; 7 July; 8 August; 9 September; 10 October; 11 November; 12 December	returned_here_month <i>Skip: Ask only if resp_returns_at_closure = 1</i> Source: Project design (measured seasonal base, asked as a spell)
D13	In those months away, how many months did you spend working somewhere other than your home place?	Whole number	months_away_for_work <i>Skip: Ask only if worked_away_in_closure = 1</i> Source: Project design (off-season labour migration)
D14	Before you started coming here, had you gone anywhere else for work?	1 Yes, 0 No	worked_other_places Source: Project design (revealed mobility, for the transferability paper)
D15	Where did you go, and what work did you do? Write what they say.		other_places_detail <i>Skip: Ask only if worked_other_places = 1; may be left blank</i> Source: Project design; coded to NCO-2015 in the office
D16	If this work here ended, would you go away from your home place to look for work in the coming year?	0 No; 1 Yes; 97 Don't know	would_move_for_work Source: Project design; horizonized intention item after VASyR 2025 (move_accom_yesno, asked over a stated 6-month horizon)

No.	Question or instruction	Answers	Variable, skip rule, source
D17	Who mainly helped you get this work, or arranged it for you?	1 A family member already working here; 2 A friend or someone from the village; 3 A thekedar or contractor I now work for; 4 An agent or middleman who placed me (usually for a fee); 5 No one; I found it myself; 6 The employer called me directly; 7 Someone else	migration_referral Source: Project design (referral channel as a proxy for social capital and for placement debt)
D18	Who was it? Write what they say.		migration_referral_other <i>Skip: Ask only if migration_referral = 7 (Other); may be left blank</i> Source: Standard household-survey item

Module E: Household consumption

Read aloud: Now about what your household usually spends in a month. For each thing I will ask twice – once for a normal month during the Yatra season, and once for a normal month when the Yatra is closed – because spending is often quite different in the two. Rough figures are fine.

No.	Question or instruction	Answers	Variable, skip rule, source
E1	Leaving aside money you send home – is what your household spends in a normal month during the Yatra season different from what it spends when the Yatra is closed?	1 Yes, 0 No	spend_differs_by_season Source: Project design (respondent-gated seasonal recall); the underlying two-season design follows Beegle et al. 2012 and Deaton and Grosh 2000 on usual-period recall
E2	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on cereals (rice, wheat, other grains), pulses, sugar and salt, bought or from your own stock? (Rs)	Rupees (whole number)	cons_staples_yatra_pm Source: HCES 2022-23, MoSPI Appendix A, Sections 5.1-5.3 (30-day); IHDS-II Income and Social Capital Questionnaire, Q14 14.1-14.6 (30-day, same items)
E3	In a normal month when the Yatra is closed, how much does your household spend on cereals (rice, wheat, other grains), pulses, sugar and salt, bought or from your own stock? (Rs)	Rupees (whole number)	cons_staples_offseason_pm <i>Skip: Ask only if spend_differs_by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Sections 5.1-5.3 (30-day); IHDS-II Income and Social Capital Questionnaire, Q14 14.1-14.6 (30-day, same items)
E4	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on milk and milk products, vegetables, fruit, egg/fish/meat, cooking oil, spices, and tea or coffee, bought or from your own stock? (Rs)	Rupees (whole number)	cons_perishables_yatra_pm Source: HCES 2022-23, MoSPI Appendix A, Sections 6.1-6.8 (7-day actual recall in HCES; asked here as a usual monthly figure instead, for the reason above)
E5	In a normal month when the Yatra is closed, how much does your household spend on milk and milk products, vegetables, fruit, egg/fish/meat, cooking oil, spices, and tea or coffee, bought or from your own stock? (Rs)	Rupees (whole number)	cons_perishables_offseason_pm <i>Skip: Ask only if spend_differs_by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Sections 6.1-6.8 (7-day actual recall in HCES; asked here as a usual monthly figure instead, for the reason above)
E6	If you (and anyone staying with you here) had not grown, raised or been given any of your food, about how much would it have cost to buy in a normal month during the Yatra season? (Rs, 0 if you buy everything)	Rupees (whole number)	cons_food_own_yatra_pm Source: Calvo and Dercon 2007; Eze and Iheonu 2025 (non-purchased food, aggregate approach)
E7	If your household had not grown, raised or been given any of your food, about how much would it have cost to buy in a normal month when the Yatra is closed? (Rs, 0 if you buy everything)	Rupees (whole number)	cons_food_own_offseason_pm <i>Skip: Ask only if spend_differs_by_season = 1</i> Source: Calvo and Dercon 2007; Eze and Iheonu 2025 (non-purchased food, aggregate approach)
E8	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on meals, tea and snacks eaten outside the home, including any an employer gave free, at their market value? (Rs)	Rupees (whole number)	cons_food_out_yatra_pm Source: HCES 2022-23, MoSPI Appendix A, Section 7.1 'served processed food' (7-day in HCES; usual monthly here)
E9	In a normal month when the Yatra is closed, how much does your household spend on meals, tea and snacks eaten outside the home, including any an employer gave free, at their market value? (Rs)	Rupees (whole number)	cons_food_out_offseason_pm <i>Skip: Ask only if spend_differs_by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Section 7.1 'served processed food' (7-day in HCES; usual monthly here)
E10	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on fuel and light: cooking fuel, firewood, electricity, kerosene, candles? (Rs)	Rupees (whole number)	cons_fuel_yatra_pm Source: HCES 2022-23, MoSPI Appendix A, Section 8.1 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.21-14.22. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E11	In a normal month when the Yatra is closed, how much does your household spend on fuel and light: cooking fuel, firewood, electricity, kerosene, candles? (Rs)	Rupees (whole number)	cons_fuel_offseason_pm <i>Skip: Ask only if spend_differs_by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Section 8.1 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.21-14.22. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)

No.	Question or instruction	Answers	Variable, skip rule, source
E12	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on soap, toiletries, cleaning goods and other small household items? (Rs)	Rupees (whole number)	<code>cons_routine_misc_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Sections 9.1-9.2 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.25-14.27. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E13	In a normal month when the Yatra is closed, how much does your household spend on soap, toiletries, cleaning goods and other small household items? (Rs)	Rupees (whole number)	<code>cons_routine_misc_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Sections 9.1-9.2 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.25-14.27. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E14	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on local transport (bus, shared jeep, auto) and phone or internet charges? (Rs)	Rupees (whole number)	<code>cons_transport_comm_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Sections 11.1-11.2 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.24/14.28. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E15	In a normal month when the Yatra is closed, how much does your household spend on local transport (bus, shared jeep, auto) and phone or internet charges? (Rs)	Rupees (whole number)	<code>cons_transport_comm_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Sections 11.1-11.2 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.24/14.28. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E16	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on rent for the home (0 if owned, and 0 for any period spent living for free)? (Rs)	Rupees (whole number)	<code>cons_rent_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Section 11.4 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.30. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E17	In a normal month when the Yatra is closed, how much does your household spend on rent for the home (0 if owned, and 0 for any period spent living for free)? (Rs)	Rupees (whole number)	<code>cons_rent_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Section 11.4 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.30. Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (30-day tier)
E18	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on medicine, doctor's or clinic fees and tests, not counting a hospital stay? (Rs)	Rupees (whole number)	<code>cons_med_nonhosp_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Section 10.3 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.33 (30-day, out-patient)
E19	In a normal month when the Yatra is closed, how much does your household spend on medicine, doctor's or clinic fees and tests, not counting a hospital stay? (Rs)	Rupees (whole number)	<code>cons_med_nonhosp_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Section 10.3 (30-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.33 (30-day, out-patient)
E20	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on biscuits, namkeen, chips, packaged snacks, cold drinks or bottled water? (Rs)	Rupees (whole number)	<code>cons_packaged_food_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Section 7.2 (7-day in HCES; usual monthly here, as for every other seasonal item)
E21	In a normal month when the Yatra is closed, how much does your household spend on biscuits, namkeen, chips, packaged snacks, cold drinks or bottled water? (Rs)	Rupees (whole number)	<code>cons_packaged_food_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Section 7.2 (7-day in HCES; usual monthly here, as for every other seasonal item)
E22	In a normal month during the Yatra season, how much do you (and anyone staying with you here) spend on pan, gutka, bidi, cigarettes, tobacco or alcohol? (Rs)	Rupees (whole number)	<code>cons_pan_tobacco_yatra_pm</code> Source: HCES 2022-23, MoSPI Appendix A, Sections 12.1-12.3 (7-day in HCES; usual monthly here, and combined into one figure)
E23	In a normal month when the Yatra is closed, how much does your household spend on pan, gutka, bidi, cigarettes, tobacco or alcohol? (Rs)	Rupees (whole number)	<code>cons_pan_tobacco_offseason_pm</code> <i>Skip: Ask only if spend_differs.by_season = 1</i> Source: HCES 2022-23, MoSPI Appendix A, Sections 12.1-12.3 (7-day in HCES; usual monthly here, and combined into one figure)
E24	In the last 12 months, how much did your household spend on clothes and footwear? (Rs)	Rupees (whole number)	<code>cons_clothing_12m</code> Source: HCES 2022-23, MoSPI Appendix A, Sections 13.1-13.2 (365-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.38-14.39 (365-day). Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 instead uses a 6-month recall for clothing (items 401-441); we follow the two India sources, since one of them (HCES) underlies our poverty line
E25	In the last 12 months, how much on education: fees, books, uniforms, tuition? (Rs)	Rupees (whole number)	<code>cons_education_12m</code> Source: HCES 2022-23, MoSPI Appendix A, Section 10.1 (365-day). IHDS-II Income and Social Capital Questionnaire, Q14 14.35-14.37 (365-day, same items). Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 asks school fees inside its education/roster module, per child, not as a household total, so it is not directly comparable

No.	Question or instruction	Answers	Variable, skip rule, source
E26	In the last 12 months, how much did your household pay for any hospital admission or stay? (Rs, 0 if none)	Rupees (whole number)	<code>cons_medical_hosp_12m</code> Source: HCES 2022-23, MoSPI Appendix A, Section 10.2 (365-day, hospitalisation). IHDS-II Income and Social Capital Questionnaire, Q14 14.34 (365-day, in-patient). Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 instead uses one combined 6-month medical item (less detail); we follow the matching HCES/IHDS split
E27	In the last 12 months, how much on durable goods: furniture, utensils, cooking appliances, phone, jewellery or ornaments, bicycle or vehicle parts? (Rs)	Rupees (whole number)	<code>cons_durables_12m</code> Source: HCES 2022-23, MoSPI Appendix A, Section 14 (365-day, 10 sub-groups). IHDS-II Income and Social Capital Questionnaire, Q14 14.40-14.48 (365-day). Nigeria GHS-Panel Wave 3, Household Questionnaire, Sections 10B/11 (12-month tier: durables, appliances, building materials). All three agree on the 12-month recall; insurance premiums, which IHDS (14.50) and the Nigeria survey (items 510-513) count here, are excluded, following HCES and standard national-accounts practice (insurance is a financial item, not consumption) – premiums are covered instead by the insurance items in Module G

Module F: Housing, amenities and assets

Read aloud: Now some questions about your house and the things your household has.

No.	Question or instruction	Answers	Variable, skip rule, source
F1	What is the main material of the floor at your usual home?	1 Mud/kaccha; 2 Cement/mud-cement; 3 Tile/mosaic/marble	<code>floor_material</code> Source: NITI Aayog National MPI housing indicator
F2	What is the main material of the roof at your usual home?	1 Thatch/wood/mud; 2 Tin/GI sheet; 3 Concrete/RCC	<code>roof_material</code> Source: NITI Aayog National MPI housing indicator
F3	What are the walls of your usual home mainly made of?	1 Mud, thatch, bamboo or other natural material; 2 Unburnt brick, wood or tin; 3 Burnt brick, cement, concrete or stone	<code>wall_material</code> Source: NITI Aayog National MPI housing indicator (wall limb)
F4	Would you describe your usual home as kaccha (mud/thatch, temporary), semi-pucca (part-concrete) or pucca (solid, permanent)?	1 Kaccha; 2 Semi-pucca; 3 Pucca	<code>house_type</code> Source: NITI Aayog National MPI housing indicator
F5	While you are here for the season, where do you sleep?	1 Own house here; 2 Rented room or house; 3 Room or dormitory the employer provides; 4 Sleeps at the shop, dhaba or workplace; 5 Tent or temporary shelter; 6 Lodge, dharamshala or ashram; 7 In the open, or a verandah; 8 Somewhere else	<code>accom_type_here</code> Source: Lyons et al. 2023, Table 2 (area/settlement conditions), adapted to a labour-migrant setting
F6	Does your usual home have an electricity connection?	1 Yes, 0 No	<code>electricity</code> Source: NITI Aayog National MPI
F7	What kind of toilet does your household use at your usual home?	1 No toilet / open defecation; 2 Pit latrine without slab or open pit; 3 Improved toilet, but shared with other households; 4 Improved toilet, used only by this household	<code>toilet_type</code> Source: NITI Aayog National MPI sanitation indicator (improved/unimproved and shared/not)
F8	What is your main source of drinking water at your usual home?	1 Piped into the house or yard; 2 Public tap or stand-pipe; 3 Handpump, tube-well or borewell; 4 Protected well or protected spring; 5 Rainwater collection; 6 Bottled, packaged or community RO; 7 Unprotected well or unprotected spring; 8 River, stream, pond or canal; 9 Tanker truck or cart with drum	<code>drinking_water</code> Source: NITI Aayog National MPI drinking-water indicator (JMP improved/unimproved taxonomy)
F9	Is the drinking water available at the house itself?	1 Yes, 0 No	<code>water_on_premises</code> Source: NITI Aayog National MPI drinking-water indicator (30-minute round-trip rule)
F10	How long does it take to go there, get the water and come back? (minutes, round trip)	Whole number	<code>water_fetch_minutes</code> <i>Skip: Ask only if water_on_premises = 0</i> Source: NITI Aayog National MPI drinking-water indicator (30-minute round-trip rule)

No.	Question or instruction	Answers	Variable, skip rule, source
F11	Who in the household usually goes to fetch it?	1 An adult woman; 2 An adult man; 3 A girl under 15; 4 A boy under 15; 5 It varies / more than one person	water_fetched_by <i>Skip: Ask only if water_on_premises = 0</i> Source: Project design (intra-household burden of water collection; DHS/NFHS ask the same item)
F12	What does your household mainly use to cook at your usual home?	1 LPG or cylinder gas; 2 Piped natural gas; 3 Electricity; 4 Biogas (gobar gas plant); 5 Kerosene; 6 Firewood; 7 Dung cakes (gobar); 8 Crop residue, straw or shrubs; 9 Charcoal; 10 Coal or lignite	cooking_fuel Source: NITI Aayog National MPI cooking-fuel indicator (its own list of dirty fuels)
F13	Does your household own: a television?	1 Yes, 0 No	owns_tv Source: NITI Aayog National MPI assets indicator
F14	... a radio?	1 Yes, 0 No	owns_radio Source: NITI Aayog National MPI assets indicator
F15	... a bicycle?	1 Yes, 0 No	owns_bicycle Source: NITI Aayog National MPI assets indicator
F16	... a motorcycle or scooter?	1 Yes, 0 No	owns_motorcycle Source: NITI Aayog National MPI assets indicator
F17	... a car, jeep or truck?	1 Yes, 0 No	owns_car Source: NITI Aayog National MPI assets indicator (car or truck limb)
F18	... a telephone of any kind, mobile or landline?	1 Yes, 0 No	owns_phone Source: NITI Aayog National MPI assets indicator
F19	... a computer or laptop?	1 Yes, 0 No	owns_computer Source: NITI Aayog National MPI assets indicator
F20	... a cart pulled by an animal?	1 Yes, 0 No	owns_animal_cart Source: NITI Aayog National MPI assets indicator
F21	... a refrigerator?	1 Yes, 0 No	owns_fridge Source: NITI Aayog National MPI assets indicator
F22	How much CULTIVABLE land does your household own or cultivate, in acres? Do not count the land the house stands on. (0 if none)	Number	land_cultivable_acres Source: Chaudhuri et al. 2002 asset covariate
F23	Does your household own any cows or buffaloes?	1 Yes, 0 No	owns_cow_buffalo Source: Chaudhuri et al. 2002 asset covariate
F24	Does your household own any goats or sheep?	1 Yes, 0 No	owns_goat_sheep Source: Chaudhuri et al. 2002 asset covariate
F25	Does your household own any ponies or mules?	1 Yes, 0 No	owns_pony_mule Source: Project design (pilot livelihood survey)
F26	Does your household own a shop or stall that you use to earn?	1 Yes, 0 No	owns_shop_stall Source: Chaudhuri et al. 2002 asset covariate
F27	Does your household own a vehicle you use to earn (for example a jeep, truck or taxi)?	1 Yes, 0 No	owns_work_vehicle Source: Chaudhuri et al. 2002 asset covariate
F28	Does your household own equipment or tools that you use to earn?	1 Yes, 0 No	owns_work_equipment Source: Chaudhuri et al. 2002 asset covariate
F29	What are they? Write what they say. Leave blank if they cannot say.		work_equipment_detail <i>Skip: Ask only if owns_work_equipment = 1; may be left blank</i> Source: Standard household-survey item

Module G: Finance, insurance and schemes

Read aloud: Now about savings, loans, insurance and government schemes.

No.	Question or instruction	Answers	Variable, skip rule, source
G1	Does anyone in your household have a bank account or a post office account?	1 Yes, 0 No	has_bank_account Source: NITI Aayog National MPI bank-account indicator; VEP adaptive-capacity covariate
G2	Is any of these a Jan Dhan account?	1 Yes, 0 No	has_jandhan_account <i>Skip: Ask only if has_bank_account = 1</i> Source: Standard household-survey item
G3	In the last 12 months, did you or anyone in your household borrow money?	1 Yes, 0 No	took_loan_12m Source: VEP adaptive-capacity covariate
G4	Who was the main lender?	1 Nationalised or public-sector bank; 2 Private bank; 3 Cooperative bank or RRB; 4 Microfinance institution or SHG; 5 Moneylender; 6 Relative or friend; 7 Employer or contractor (advance); 8 Other	credit_source <i>Skip: Ask only if took_loan_12m = 1</i> Source: VEP adaptive-capacity covariate (lender type)

No.	Question or instruction	Answers	Variable, skip rule, source
G5	How much of that loan is still left to repay? (Rs)	Rupees (whole number)	<code>loan_amount</code> <i>Skip: Ask only if took_loan_12m = 1</i> Source: Islam and Chowdhury 2025 (financial distress and household vulnerability to poverty)
G6	Do you pay interest on it?	1 Yes, 0 No	<code>pays_interest</code> <i>Skip: Ask only if took_loan_12m = 1</i> Source: Project design (informal lending is often interest-free)
G7	On every 100 rupees you borrowed, about how much interest do you pay in a month? (Rs; 0 if none, leave blank if not known)	Number	<code>loan_interest_per100_pm</code> <i>Skip: Ask only if took_loan_12m = 1; may be left blank</i> Source: Project design (informal-credit pricing as locally quoted)
G8	Did you have to give something as security for it – an animal, a vehicle, jewellery, land or your business?	1 Yes, 0 No	<code>loan_against_asset</code> <i>Skip: Ask only if took_loan_12m = 1</i> Source: Carter and Zimmerman 2000; Chiwaula et al. 2011 (asset-based vulnerability)
G9	What did you have to give as security?	1 Jewellery or ornaments; 2 Land; 3 Animals; 4 A vehicle; 5 Shop stock or business goods; 6 House or building; 7 Something else	<code>loan_collateral</code> <i>Skip: Ask only if loan_against_asset = 1</i> Source: Carter and Zimmerman 2000; Zimmerman and Carter 2003 (asset-based coping)
G10	How many people in your household are covered by any health insurance or health scheme, including government ones? (0 if none)	Whole number	<code>n_health_insured</code> Source: NITI Aayog National MPI health-insurance indicator; Lyons et al. 2023
G11	How many people in your household have life insurance? (0 if none)	Whole number	<code>n_life_insured</code> Source: Standard household-survey item
G12	Is your crop insured?	1 Yes, 0 No	<code>has_crop_insurance</code> <i>Skip: Ask only if land_cultivable_acres > 0</i> Source: Standard household-survey item
G13	In the last 12 months, did your household get anything from any of these? Read the list out and check every one they say yes to.	1 Ration card / PDS food grain; 2 MGNREGA work or job card; 3 Old-age, widow or disability pension; 4 PM-KISAN (farmer cash transfer); 5 Ujjwala LPG connection; 6 PM-SYM or Atal Pension Yojana; 7 Ayushman Bharat / health insurance card; 8 Housing scheme (PMAY or state); 9 Some other scheme; 10 None of these	<code>govt_schemes</code> Source: Project design; scheme names as administered in Uttarakhand
G14	Which scheme was that? Write what they say.		<code>govt_scheme_other</code> <i>Skip: Ask only if govt_schemes includes 9 (Some other scheme); may be left blank</i> Source: Standard household-survey item
G15	Can you draw your ration here, or only at your home place?	1 Yes, can draw it here; 2 No, only at the home place; 3 Has never tried; 97 Does not know	<code>ration_portable_here</code> <i>Skip: Ask only if govt_schemes includes 1 (ration card)</i> Source: Lyons et al. 2023, Table 2 (legal residency), adapted; One Nation One Ration Card
G16	Do you own a smartphone?	1 Yes, 0 No	<code>smartphone_owned</code> Source: VEP adaptive-capacity covariate; STEP digital items
G17	Do you ever use UPI or another way of paying by phone?	1 Yes, 0 No	<code>uses_digital_payment</code> Source: VEP adaptive-capacity covariate; STEP digital items
G18	How many people in your household can make a payment by phone themselves, without help? (0 if none)	Whole number	<code>n_can_transact_online</code> Source: Project design (intra-household financial capability)

Module H: Health

Read aloud: Now a few questions about health in your household. You may leave out any of these.

No.	Question or instruction	Answers	Variable, skip rule, source
H1	In the last 15 days, was anyone in your household ill?	1 Yes, 0 No	<code>morbidity_15d</code> Source: NSS health module (15-day recall) [source not held by this project; citation unverified as of 2026-09-28]
H2	How did the household mainly cope with the cost of this: used savings; borrowed money; sold or pawned assets; cut other consumption; got help from relatives or community; or something else?	1 Used savings; 2 Borrowed money; 3 Sold or pawned assets; 4 Cut consumption; 5 Help from relatives/community; 6 Did nothing/other	<code>morbidity_coping_15d</code> <i>Skip: Ask only if morbidity_15d = 1</i> Source: Project design (a reported illness with no cost/coping follow-up said nothing about its burden)
H3	About how much did the household spend on this in the last 15 days (medicine, doctor or clinic fees, travel for care)? (Rs)	Rupees (whole number)	<code>morbidity_cost_15d</code> <i>Skip: Ask only if morbidity_15d = 1</i> Source: Project design

No.	Question or instruction	Answers	Variable, skip rule, source
H4	Do you have difficulty walking or climbing steps?	1 No difficulty; 2 Some difficulty; 3 A lot of difficulty; 4 Cannot do it at all	func_limitation Source: Washington Group on Disability Statistics, Short Set item 3 (mobility), verbatim; Lyons et al. 2023 health dimension
H5	In the last 12 months, was anyone in your household admitted to hospital overnight?	1 Yes, 0 No	hospitalization.365d Source: NSS health module (365-day recall) [source not held by this project; citation unverified as of 2026-09-28]
H6	In the last 3 months, was there a time when someone in your household needed medical care but could not get it?	1 Yes, 0 No	health_access_barrier.3m Source: VASyR 2025 barriers_health_case_access_phc_m (primary-care access barriers); Lyons et al. 2023 Table 2 indicator 2 'healthcare access'
H7	In the last five years, has any child or young person under 18 in your household died?	1 Yes, 0 No	child_death.5y Source: NITI Aayog National MPI, Child and Adolescent Mortality (weight 1/12)
H8	In the last five years, did any woman in your household give birth?	1 Yes, 0 No	birth.last.5y Source: NITI Aayog National MPI, Maternal Health (weight 1/12)
H9	For the most recent birth, did she have at least four check-ups before the delivery?	0 No; 1 Yes; 97 Don't know	anc.4.visits <i>Skip: Ask only if birth.last.5y = 1</i> Source: NITI Aayog National MPI, Maternal Health (antenatal care limb)
H10	Was that delivery done with the help of a doctor, nurse or trained midwife?	0 No; 1 Yes; 97 Don't know	skilled.birth.attendant <i>Skip: Ask only if birth.last.5y = 1</i> Source: NITI Aayog National MPI, Maternal Health (assisted delivery limb)

Module I: Food security, shocks and coping

Read aloud: Now about food, and about any difficult times in the last year and how your household managed.

No.	Question or instruction	Answers	Variable, skip rule, source
I1	In the last 12 months, did any of these happen – to your household, or to the Yatra route you work on? Check every one that applies.	1 Serious illness or death of an earning member; 2 Crop failure or livestock loss; 3 Damage from a natural disaster (flood, landslide, fire); 4 Loss of business, goods or assets; 5 Road or bridge blocked, route closed; 6 Yatra stopped early or badly disrupted; 7 Sharp fall in customers or prices; 8 Lost the work or the work stopped	distress.event.last365d Source: VEP exposure covariate (Azeem et al. 2016); shock inventory following Gunther and Harttgen 2009, via Fujii 2016 section 4
I2	Of those, which one was hardest for your household?	1 Serious illness or death of an earning member; 2 Crop failure or livestock loss; 3 Damage from a natural disaster (flood, landslide, fire); 4 Loss of business, goods or assets; 5 Road or bridge blocked, route closed; 6 Yatra stopped early or badly disrupted; 7 Sharp fall in customers or prices; 8 Lost the work or the work stopped	shock.worst <i>Skip: Ask only if distress_event.last365d is not empty</i> Source: Project design (anchors the magnitude and timing pair)
I3	Because of that, about how much did your household lose in earnings, or have to spend? (Rs)	Rupees (whole number)	shock.loss.amount <i>Skip: Ask only if distress_event.last365d is not empty</i> Source: Ligon and Schechter 2003; Dercon and Krishnan 2000 (VER needs shock magnitude, not only incidence)
I4	In which month did that happen?	1 January; 2 February; 3 March; 4 April; 5 May; 6 June; 7 July; 8 August; 9 September; 10 October; 11 November; 12 December	shock.month <i>Skip: Ask only if distress_event.last365d is not empty</i> Source: Dercon and Krishnan 2000 (seasonal timing of shocks); project design
I5	How did your household manage? Check every one they used.	1 Used savings; 2 Borrowed money; 3 Sold or pawned assets; 4 Cut consumption; 5 Help from relatives/community; 6 Did nothing/other	shock.coping <i>Skip: Ask only if any shock was reported</i> Source: Coping strategies in VEP studies; Carter and Zimmerman 2000 on asset versus consumption smoothing

No.	Question or instruction	Answers	Variable, skip rule, source
16	In a normal week during the Yatra season, to cope with a lack of food or money to buy it, how many days did your household rely on less expensive/less preferred food? (0-7 days)	Whole number	<code>cope_less_pref_food.yatra.wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
17	In a normal week when the Yatra is closed, to cope with a lack of food or money to buy it, how many days did your household rely on less expensive/less preferred food? (0-7 days)	Whole number	<code>cope_less_pref_food.offseason.wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
18	In a normal week during the Yatra season, to cope with a lack of food or money to buy it, how many days did your household borrow food and/or rely on help from friends/relatives? (0-7 days)	Whole number	<code>cope_borrow_food.yatra.wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
19	In a normal week when the Yatra is closed, to cope with a lack of food or money to buy it, how many days did your household borrow food and/or rely on help from friends/relatives? (0-7 days)	Whole number	<code>cope_borrow_food.offseason.wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.

No.	Question or instruction	Answers	Variable, skip rule, source
I10	In a normal week during the Yatra season, to cope with a lack of food or money to buy it, how many days did your household reduce the number of meals eaten per day? (0-7 days)	Whole number	<code>cope_reduce_meals_yatra_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
I11	In a normal week when the Yatra is closed, to cope with a lack of food or money to buy it, how many days did your household reduce the number of meals eaten per day? (0-7 days)	Whole number	<code>cope_reduce_meals_offseason_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
I12	In a normal week during the Yatra season, to cope with a lack of food or money to buy it, how many days did your household reduce portion size of meals? (0-7 days)	Whole number	<code>cope_reduce_portion_yatra_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
I13	In a normal week when the Yatra is closed, to cope with a lack of food or money to buy it, how many days did your household reduce portion size of meals? (0-7 days)	Whole number	<code>cope_reduce_portion_offseason_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.

No.	Question or instruction	Answers	Variable, skip rule, source
I14	In a normal week during the Yatra season, to cope with a lack of food or money to buy it, how many days did your household restrict consumption of adults/mothers in order for young children to eat? (0-7 days)	Whole number	<code>cope_restrict_adult_yatra_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.
I15	In a normal week when the Yatra is closed, to cope with a lack of food or money to buy it, how many days did your household restrict consumption of adults/mothers in order for young children to eat? (0-7 days)	Whole number	<code>cope_restrict_adult_offseason_wk</code> Source: VASyR 2025 (exact item wording); WFP rCSI; The reduced Coping Strategy Index (rCSI): five food-coping questions, standard WFP weights (1, 2, 1, 1, 3) applied when the index is built. The Kedarnath instrument otherwise has no food-security module, which is a gap for a poverty-vulnerability survey; these five short questions close it at low cost instead of a full dietary-diversity module, left out to stay inside the 45-minute limit. Kept as day-counts (0-7), not collapsed to yes/no: this is the standard, validated WFP/FAO specification (frequency x severity), and no comparably-standard binary version was found on checking; a day-count also takes about as long to answer as a yes/no in practice, so little interview time is saved by simplifying it.

Module J: Ropeway

Read aloud: Now two questions about the ropeway that has been proposed between Gaurikund and Kedarnath.

No.	Question or instruction	Answers	Variable, skip rule, source
J1	A ropeway is proposed between Gaurikund and Kedarnath. Are you in favour, neutral, or against?	1 Support; 2 Neutral; 3 Oppose; 98 Prefer not to say	<code>ropeway_stance</code> Source: Project design
J2	Is your main Yatra work carrying, transporting or guiding people or goods on the Gaurikund to Kedarnath trek?	1 Yes, 0 No	<code>trek_dependent</code> Source: Project design (see tasks_module W4: exposure must be asked directly)

Module K: Job quality (Apablaza et al. 2026 questions)

Read aloud: Now a set of questions about the conditions of your work – hours, pay, contract and so on. These come from a standard list used in many countries, so one or two may not fit your situation. Say so and we will move on.

No.	Question or instruction	Answers	Variable, skip rule, source
K1	Which best describes your situation during the last month: you work for pay full-time; you work for pay part-time or do occasional jobs; you study and work; you only study; you are only being trained for work; you are retired or pensioned; you do unpaid household tasks or care for others; you are unemployed and actively looking for work; you are sick or disabled and cannot work; or none of these?	1 Works for pay full-time; 2 Works for pay part-time or occasional jobs; 3 Studies and works; 4 Only studies; 5 Being trained for work only; 6 Retired or pensioned; 7 Unpaid household tasks or caring for others; 8 Unemployed, actively seeking work; 9 Sick or disabled, cannot work; 10 Neither studying, working nor seeking work; 97 Does not know	<code>job_situation</code> Source: Apablaza et al. 2026, Appendix 2 Q5 (all eleven categories, with its own three-way routing)
K2	Is your job: permanent; seasonal or temporary; occasional or casual; on probation; or fixed-term?	1 Permanent; 2 Seasonal or temporary; 3 Occasional or casual; 4 On probation; 5 Fixed-term	<code>job_permanence</code> <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q9

No.	Question or instruction	Answers	Variable, skip rule, source
K3	Do you have a signed contract? Yes, signed; yes but not yet signed; no contract.	1 Yes, signed; 2 Yes, but not yet signed; 3 No contract	contract.status <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working); and employment_type is 3 or 4 (wage workers) – self-employed skip to the next question</i> Source: Apablaza et al. 2026, Appendix 2 Q11
K4	Is your workplace or business registered, for example with a taxpayer or GST number, a shop or trade licence, the Yatra registration, or a union?	1 Yes, 0 No	workplace.registered <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q12 (widened to local registrations)
K5	Do you contribute to any pension system? Yes, the employer deducts it; yes, voluntarily; no.	1 Yes, employer deducts it; 2 Yes, contributes voluntarily; 3 No	pension.contrib <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q16
K6	Do you have health insurance through your work? Yes; only private or other insurance; none; don't know.	1 Yes, through work; 2 Only private or other insurance; 3 None; 4 Don't know	work.health.ins <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q17
K7	Do you have the right to paid holiday, sick or maternity leave?	0 No; 1 Yes; 97 Don't know	leave.rights <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q18
K8	Have you ever been physically injured at your workplace?	0 No; 1 Yes; 97 Don't know	injured.ever <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q19
K9	In the last 12 months, was anyone physically injured or killed at your workplace because of work?	0 No; 1 Yes; 97 Don't know	workplace.injury.12m <i>Skip: Ask only if job_situation is 1, 2 or 3 (currently working)</i> Source: Apablaza et al. 2026, Appendix 2 Q20
K10	Would you like to work more hours than you do?	0 No; 1 Yes; 97 Don't know	wants.more.work <i>Skip: Ask if job_situation is 1 to 7 (Apablaza routes codes 4-7 straight to this question)</i> Source: Apablaza et al. 2026, Appendix 2 Q21
K11	On a working day, how many MORE hours would you like to work?	Whole number	more.hours.day <i>Skip: Ask if wants_more_work = 1, or if job_situation = 8 (Apablaza routes the unemployed-and-seeking category here directly)</i> Source: Apablaza et al. 2026, Appendix 2 Q22
K12	Across the months when you had no paid work, about how many MONTHS in total were you looking for work?	Whole number	months.looked.for.work <i>Skip: Ask if any month in the calendar is 'No paid work', or if job_situation = 8</i> Source: Apablaza et al. 2026, Appendix 2 Q23 (duration in weeks, tied to the calendar instead of a single point in time)
K13	Was your current work the first paid job you ever had?	0 No; 1 Yes; 97 Don't know	first.job.ever Source: Apablaza et al. 2026, Appendix 2 Q24

Module L: Tasks and skills (short block)

Read aloud: Last, I will read out some kinds of work-tasks and ask whether you do them. There is no right or wrong answer – we are trying to understand what skills the work here actually uses.

No.	Question or instruction	Answers	Variable, skip rule, source
L1	Do you load, unload, stack or count goods? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.load Source: Gathmann and Schonberg 2010; NCO 9333.0100 loader
L2	Do you drive a motor vehicle? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.drive Source: Spitz-Oener 2006 / STEP; NCO 8322.0100
L3	Do you operate an engine or machine? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.engine Source: Gathmann and Schonberg 2010; NCO 8343.1700 ropeway operator
L4	Do you do electrical or wiring work? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.electric Source: Spitz-Oener 2006; NCO 7411.0301 wireman
L5	Do you check equipment or the route for safety? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.safety Source: Gathmann and Schonberg 2010; NCO 8343.1700
L6	Do you sell goods or services? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.sell Source: Gathmann and Schonberg 2010; NCO 5223.0200

No.	Question or instruction	Answers	Variable, skip rule, source
L7	Do you handle cash and payments? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.cash Source: Autor and Handel 2013; NCO 5131.0401
L8	Do you cook or prepare food or drink? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.cook Source: NCO 5120.0300 cook
L9	Do you serve guests or customers? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.serve Source: NCO 5131.0401 waiter; Pal et al. 2026
L10	Do you clean rooms or public areas? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.clean Source: NCO 5151.0202 room attendant; Autor-Levy-Murnane 2003 (janitorial)
L11	Do you guide or explain things to visitors? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.guide Source: Gathmann and Schonberg 2010; NCO 5113.0200
L12	Do you coordinate work by phone, radio or signals? (1 regularly in my main Yatra work; 2 not in my main work, but done before elsewhere; 3 never)	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done	tk.coord Source: NCO 8343.1700 ropeway operator
L13	Have you ever driven a motorcycle or scooter, with or without a licence?	1 Yes, 0 No	drove.twowheeler <i>Skip: Ask only if tk_drive is 1 or 2</i> Source: Level ladder without licences: people drive without holding a licence
L14	... a car or jeep?	1 Yes, 0 No	drove.car <i>Skip: Ask only if tk_drive is 1 or 2</i> Source: Level ladder without licences
L15	... a truck or bus?	1 Yes, 0 No	drove.heavy <i>Skip: Ask only if tk_drive is 1 or 2</i> Source: Level ladder without licences
L16	In your work, do you read anything (notes, rate lists, tickets, messages)?	1 Yes, 0 No	read.at.work Source: STEP module 6A
L17	In your work, do you work out prices or costs?	1 Yes, 0 No	calc.at.work Source: STEP module 6A

4. Variables built afterwards (not asked)

All of these are computed in Stata (do/02_build_final_dataset.do) from the asked answers, so the analysis starts from raw answers and every step can be checked.

Variable	Meaning	How it is made
education_years	The direct year count (years.schooling) when the respondent knew it; otherwise the midpoint of the fallback bracket (education_level_cat: 0/2/7/11 for no-formal/some-primary/primary-complete/secondary-plus); missing if the respondent preferred not to say.	years.schooling if knows_years_schooling==1, else bracket midpoint from education_level_cat
hoh_female	Derived from the gendered relationship categories: husband/father/son/brother/other-male imply a male head, wife/mother/daughter/sister/other-female a female head, and when the respondent IS the head it is their own sex. Replaces a separate male/female question.	from hoh_relation; = female if hoh_relation==1
months_here	Derived from the absence spell: 12 minus the months between left_here.month and returned_here.month, or 12 for a respondent who never leaves. This is the measured length of the respondent OWN season, in place of a constant applied to everyone, and it is what the mid-month Yatra-start problem resolves to – the boundary is the month they reported, not one we chose.	12 - months_home_base - months_third_place
months_home_base	Months in the absence spell that were NOT spent working elsewhere. The spell straddles the new year – the Yatra closes in November and reopens in April or May – so the arithmetic wraps, which is handled in Stata.	spell length minus months_away_for_work
months_third_place	months_away_for_work as reported, 0 for anyone who did not work away. Off-season labour migration with a length on it, which the old yes/no could not give.	months_away_for_work, else 0
closure_labour_migrant	1 if the respondent reported working away during the closure. Type B in the closure-regime typology and the mobility variable that actually carries information in this population, in place of a migrant dummy built on district boundaries – which the pilot shows would classify 11 of 20 seasonal movers as non-movers.	worked_away_in_closure==1

Variable	Meaning	How it is made
cons_pc_denom_season	n.here_season for a split household, hhsize for everyone else. This is the fix for a real error in the poverty headcount: per-capita consumption divided the Yatra-season figure – which covers only “you and anyone staying with you here” – by the FULL household size, so a man supporting himself here for six months while a family of five lived at the home place was recorded at a fraction of his true per-capita consumption and counted as poor by arithmetic. The off-season half keeps hh-size, because by then the household is reunited.	n.here_season if split_household==1, else hh-size
stays_all_year	1 if the respondent does not go to the home place at closure. The case the two-season design of this instrument does NOT fit: for these respondents the Yatra-season and off-season questions describe the same place, and the pair should be checked for a suspiciously high identical-answer rate at the pilot.	resp_returns_at_closure==0
split_household	1 if the rest of the household lives at the home place year-round. The case Module E Yatra-season wording was written for, and the case whose per-capita consumption was being computed wrongly until n.here_season existed.	hh_at_home_place==1
credit_institutional	1 if the household borrowed in the last 12 months from a bank, cooperative, RRB, microfinance institution or SHG (credit_source 1-4); 0 otherwise, INCLUDING households that did not borrow at all. Defined for every respondent on purpose: credit_source itself is now gated behind took_loan.12m, so using it directly as a VEP covariate would drop every non-borrower from the regression.	took_loan.12m==1 & in-range(credit_source,1,4)
credit_informal	1 if the household borrowed from a moneylender, relative, friend, employer or contractor (credit_source 5-8); 0 otherwise, including non-borrowers. Separated from institutional credit because the two have opposite signs for vulnerability.	took_loan.12m==1 & in-range(credit_source,5,8)
migrant	1 if origin is not Local (same district).	origin != 1
health_access_tier	Remoteness of the interview site along the route, derived from the interview GPS rather than from an enumerator-coded cluster: the route runs from the road-head and its hospital up to the shrine, so position along it is what determines how reachable care is. Latitude bands (research team’s route crosswalk): below 30.58 Good, 30.58 to 30.66 Moderate, 30.66 and above Poor. Bands, not coordinates, enter the analysis, so the exported data still carries no named site.	from gps_lat: 3 if <30.58; 2 if 30.58-30.66; 1 if >30.66
health_access_deprived	1 if the site tier is Poor, or Moderate and nobody in the household has health cover. health_insurance_covered was REMOVED: it asked whether “your household” is covered, which for a split migrant household – the worker here, the family elsewhere – does not name a group the respondent can answer for. n.health_insured, a count of covered members, replaces it and is strictly more informative. This variable is also no longer part of the MPI: the health dimension now uses NITIT’s own mortality and maternal indicators, so this is kept only as a VEP exposure covariate.	tier==1 — (tier==2 & n.health_insured==0)
yatra_months	Count of calendar months with status 1 (Yatra work).	count of status_m1-status_m12 == 1
yatra_start_month	First calendar month coded Yatra work.	first m with status_m == 1
yatra_end_month	Last calendar month coded Yatra work.	last m with status_m == 1
offseason_months_worked	Months coded 2 to 7 (any paid activity other than Yatra work).	count of status_m in 2..7
months_no_work	Months coded 8.	count of status_m == 8
offseason_primary	The activity that fills most of the non-Yatra months (ties go to the lower code; all months idle gives 8).	modal status_m among months where status_m != 1
income_from_fallback	1 if the respondent could not give month-by-month earnings and was routed to income_annual_total + pct_income_yatra instead. Carry this into every VEP regression as a robustness split: fallback respondents have a flatter within-season earnings profile by construction (see income_seasonality_cv), so their estimated variance is not measured the same way as everyone else’s.	knows_monthly_income == 0
yatra_income	Calendar path: sum of monthly earnings in the months coded Yatra work. Fallback path: the annual total times the respondent’s own Yatra share.	knows_monthly_income==1: sum income_m if status_m==1; else income_annual_total * pct_income_yatra/100
non_yatra_income	Calendar path: sum of monthly earnings in the other months. Fallback path: the annual total times the remaining share.	knows_monthly_income==1: sum income_m if status_m!=1; else income_annual_total * (100-pct_income_yatra)/100
income_pm_yatra_eq	Yatra earnings spread evenly across the months the calendar codes as Yatra work. Defined for fallback respondents only; for calendar respondents the actual monthly figures are used instead.	yatra_income / yatra_months if income_from_fallback==1
income_pm_other_eq	Non-Yatra earnings spread evenly across the remaining months. Defined for fallback respondents only.	non_yatra_income / (12 - yatra_months) if income_from_fallback==1
remittance_outward_annual	Yatra-season months at the Yatra-season usual amount, other months at the off-season usual amount.	yatra_months*remit_out_yatra_pm + (12-yatra_months)*remit_out_offseason_pm
remittance_inward_annual	Yatra-season months at the Yatra-season usual amount, other months at the off-season usual amount.	yatra_months*remit_in_yatra_pm + (12-yatra_months)*remit_in_offseason_pm
total_annual_income	Work income plus inward remittances. Outward remittances are not subtracted.	yatra_income + non_yatra_income + remittance_inward_annual
yatra_income_share	Yatra income divided by total annual income (an Exposure covariate in the VEP model).	yatra_income / total_annual_income

Variable	Meaning	How it is made
income_seasonality_cv	Calendar path: coefficient of variation across the twelve reported monthly earnings (n-1 divisor). Fallback path: the same CV computed on a two-level series – income_pm_yatra_eq in each Yatra month, income_pm_other_eq in each other month – so the variable is never missing and no respondent silently drops out of the FGLS for want of it. IMPORTANT: the fallback series has no within-season variation by construction, so its CV captures only the between-season swing and is a LOWER BOUND on true seasonality. Always run the VEP arms with income_from_fallback interacted or split; do not treat the two paths as the same measurement.	calendar: rowstd(income.m1..12)/rowmean(income.m1..12) fallback: CV of the two-level series built from income_pm_yatra_eq and income_pm_other_eq over yatra_months and 12-yatra_months
cons_staples_pm	Staples spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_staples_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_staples_offseason_pm}) / 12$
cons_perishables_pm	Perishables spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_perishables_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_perishables_offseason_pm}) / 12$
cons_food_own_pm	Home-grown/gifted food spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_food_own_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_food_own_offseason_pm}) / 12$
cons_food_out_pm	Food eaten outside spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_food_out_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_food_out_offseason_pm}) / 12$
cons_fuel_pm	Fuel and light spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_fuel_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_fuel_offseason_pm}) / 12$
cons_routine_misc_pm	Toiletries/consumables spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_routine_misc_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_routine_misc_offseason_pm}) / 12$
cons_transport_comm_pm	Transport/communication spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_transport_comm_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_transport_comm_offseason_pm}) / 12$
cons_rent_pm	Rent spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_rent_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_rent_offseason_pm}) / 12$
cons_med_nonhosp_pm	Medical, non-hospital spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_med_nonhosp_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_med_nonhosp_offseason_pm}) / 12$
cons_packaged_food_pm	Packaged snacks and drinks spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_packaged_food_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_packaged_food_offseason_pm}) / 12$
cons_pan_tobacco_pm	Pan, tobacco and intoxicants spending, weighted by the length of the Yatra season and the rest of the year.	$(\text{yatra_months} * \text{cons_pan_tobacco_yatra_pm} + (12 - \text{yatra_months}) * \text{cons_pan_tobacco_offseason_pm}) / 12$
cons_food_pm	Staples + perishables + home-grown/gifted + eaten outside + packaged snacks and drinks, each already weighted by season. Packaged food is inside HCES's own food block (Section 7), so it belongs here; pan, tobacco and intoxicants are a separate MPCE category in HCES and are added to total.cons.pm instead.	$\text{cons_staples_pm} + \text{cons_perishables_pm} + \text{cons_food_own_pm} + \text{cons_food_out_pm} + \text{cons_packaged_food_pm}$
cons_clothing_12m_pm	Annual figure divided by 12, rounded.	$\text{round}(\text{cons_clothing_12m} / 12)$
cons_education_12m_pm	Annual figure divided by 12, rounded.	$\text{round}(\text{cons_education_12m} / 12)$
cons_medical_12m	Non-hospitalisation (annual-average month x 12) + hospitalisation (12-month).	$\text{cons_med_nonhosp_pm} * 12 + \text{cons_medical_hosp_12m}$
cons_medical_12m_pm	Non-hospitalisation (already an annual-average month) + hospitalisation divided by 12, rounded.	$\text{cons_med_nonhosp_pm} + \text{round}(\text{cons_medical_hosp_12m} / 12)$
cons_durables_12m_pm	Annual figure divided by 12, rounded.	$\text{round}(\text{cons_durables_12m} / 12)$
total_cons_pm	Food (annual-average month above) + fuel + toiletries + transport/communication + rent (each annual-average) + the four monthly-equivalent annual items. This is a true annual-average monthly figure, not a single-season snapshot.	$\text{food_pm} + \text{fuel_pm} + \text{pan_tobacco_pm} + \text{routine_misc_pm} + \text{transport_comm_pm} + \text{rent_pm} + \text{clothing_pm} + \text{education_pm} + \text{medical_pm} + \text{durables_pm}$
cons_pc_pm	Household consumption per month divided by household size, rounded. This is the VEP outcome (its log).	$\text{round}(\text{total_cons_pm} / \text{hhsz})$
cons_pc_pm_narrow	Only the non-lumpy items (food incl. packaged, pan/tobacco, fuel, toiletries, transport/communication, rent), each already an annual-average month, per person. Leaves out the annual items, as in Dercon and Krishnan 2000. For robustness of the variance model; not comparable with the poverty line.	$(\text{food_pm} + \text{pan_tobacco_pm} + \text{fuel_pm} + \text{routine_misc_pm} + \text{transport_comm_pm} + \text{rent_pm}) / \text{hhsz}$
cons_pc_ae_pm	Household consumption divided by (adults + 0.5 x children under 15), where adults = household size minus children under 15. One simple scale; the choice of scale is a sensitivity check.	$\text{total_cons_pm} / (\text{hhsz} - \text{n_children_u15} + 0.5 * \text{n_children_u15})$
poverty_line	Sethu, Surya and Ruthu (2024) construct TWO lines for 2022-23 by the Rangarajan method: Rs 2,515 per capita per month rural and Rs 3,639 urban. Which applies is decided by home_rural_urban – the respondent's USUAL place of residence, not the Yatra worksite. Until this variable existed the build applied the rural line to everyone, which measured urban-resident workers against a line 31 percent too low and understated their poverty.	2515 if home_rural_urban==1, else 3639
poor	1 if per-capita monthly consumption is below the rural or urban line that applies to this respondent.	$\text{cons_pc_pm} \leq \text{poverty_line}$
poor_sensitivity_cpi	1 if below the Rangarajan and Dev 2024 CPI-adjusted line; robustness only.	$\text{cons_pc_pm} \leq 1850$
durables_count	Legacy six-item count kept only so earlier outputs stay reproducible. DO NOT use for the MPI: the asset indicator is mpi_asset_deprived, which applies NITI's actual rule to its actual eight-item list.	$\text{owns_tv} + \text{owns_radio} + \text{owns_bicycle} + \text{owns_motorcycle} + \text{owns_car} + \text{owns_fridge}$
productive_assets_count	Sum of the six productive-asset binaries (livestock, pony/mule, shop/stall, work vehicle, work equipment).	$\text{owns_cow_buffalo} + \text{owns_goat_sheep} + \text{owns_pony_mule} + \text{owns_shop_stall} + \text{owns_work_vehicle} + \text{owns_work_equipment}$
water_deprived	NITI rule, BOTH limbs: deprived if the source is unimproved (codes 7-9), OR the source is improved but the round trip to fetch it takes over 30 minutes. The second limb could not be evaluated at all before water_on_premises and water_fetch_minutes existed.	$\text{inrange}(\text{drinking_water}, 7, 9) \text{ OR } (\text{water_on_premises} == 0 \text{ \& } \text{water_fetch_minutes} > 30)$

Variable	Meaning	How it is made
cooking_fuel_deprived	NITI rule: deprived if the household cooks with firewood, dung, crop residue/shrubs, charcoal or coal (codes 6-10). Kerosene (5) is NOT counted, because NITI's own list does not name it; the global MPI does count it, so this is a documented departure and the raw fuel code is retained so either rule can be applied later.	$\text{inlist}(\text{cooking_fuel}, 6, 7, 8, 9, 10)$
mpi_asset_count	Radio, TV, telephone, computer, animal cart, bicycle, motor-bike, refrigerator – NITI's own list. Car or truck is NOT in this count; it is a separate limb of the indicator.	$\text{owns_radio} + \text{owns_tv} + \text{owns_phone} + \text{owns_computer} + \text{owns_animal_cart} + \text{owns_bicycle} + \text{owns_motorcycle} + \text{owns_fridge}$
mpi_asset_deprived	NITI rule exactly: deprived if the household does not own MORE THAN ONE of the eight small assets AND does not own a car or truck. The previous version summed six assets into a plain count, which is not NITI's rule and is not comparable to any published National MPI figure.	$\text{mpi_asset_count} \neq 1 \ \& \ \text{owns_car} == 0$
child_school_dep	1 if any child aged 6 to 14 is not attending school; missing if no such child.	$\text{n_children_out_school} \neq 0 \ \& \ \text{n_children_6_14} \neq 0$
shock_1	1 if 'Serious illness or death of an earning member' was ticked.	$\text{distress_event_last365d}$ contains 1
shock_2	1 if 'Crop failure or livestock loss' was ticked.	$\text{distress_event_last365d}$ contains 2
shock_3	1 if 'Damage from a natural disaster (flood, landslide, fire)' was ticked.	$\text{distress_event_last365d}$ contains 3
shock_4	1 if 'Loss of business, goods or assets' was ticked.	$\text{distress_event_last365d}$ contains 4
shock_5	1 if 'Road or bridge blocked, route closed' was ticked.	$\text{distress_event_last365d}$ contains 5
shock_6	1 if 'Yatra stopped early or badly disrupted' was ticked.	$\text{distress_event_last365d}$ contains 6
shock_7	1 if 'Sharp fall in customers or prices' was ticked.	$\text{distress_event_last365d}$ contains 7
shock_8	1 if 'Lost the work or the work stopped' was ticked.	$\text{distress_event_last365d}$ contains 8
cope_1	1 if 'Used savings' was ticked.	shock_coping contains 1
cope_2	1 if 'Borrowed money' was ticked.	shock_coping contains 2
cope_3	1 if 'Sold or pawned assets' was ticked.	shock_coping contains 3
cope_4	1 if 'Cut consumption' was ticked.	shock_coping contains 4
cope_5	1 if 'Help from relatives/community' was ticked.	shock_coping contains 5
cope_6	1 if 'Did nothing/other' was ticked.	shock_coping contains 6
shock_count	Count of shock types ticked. The old single-answer item could only ever be 0 or 1.	sum of shock_1..8
shock_any	1 if any shock was ticked.	$\text{shock_count} \neq 0$
shock_covariate	1 if any of: natural disaster, road or bridge blocked, Yatra stopped or disrupted, sharp fall in customers or prices (codes 3, 5, 6, 7). These hit the whole route at once, so they are the shocks a ropeway – or a flood year – delivers to everyone simultaneously. Separating them from idiosyncratic shocks is what makes the covariate/idiosyncratic variance decomposition identifiable.	any of shock_3 shock_5 shock_6 shock_7
shock_idiosyncratic	1 if any of: illness or death of an earning member, crop or livestock loss, loss of business or assets, lost the work (codes 1, 2, 4, 8). These hit one household at a time.	any of shock_1 shock_2 shock_4 shock_8
coped_sold_assets	1 if selling or pawning assets was among the responses. Kept as its own variable because the asset-smoothing test compares it directly against cutting consumption, and the two are no longer mutually exclusive.	cope_3
coped_cut_consumption	1 if cutting consumption was among the responses. See coped_sold_assets – a household doing BOTH, or cutting consumption precisely in order to avoid selling, is the case the single-answer item could not represent.	cope_4
mpi_mortality_dep	NITI: a child or adolescent under 18 died in the household in the last five years.	$\text{child_death_5y} == 1$
mpi_maternal_dep	NITI: a woman who gave birth in the last five years did not have at least four antenatal visits for the most recent birth, OR was not assisted by trained personnel at that birth. Households with no birth in the window are NOT deprived, per NITI's own treatment.	$\text{birth_last_5y} == 1 \ \& \ (\text{anc_4_visits} != 1 \ \text{---} \ \text{skilled_birth_attendant} != 1)$
mpi_schooling_dep	NITI: not even one household member aged 10 or older has completed six years of schooling.	$\text{any_member_6yr_schooling} == 0$
mpi_attendance_dep	NITI: any school-aged child is not attending school up to the age at which they would complete class 8. Not deprived where the household has no child in that range.	$\text{n_children_out_school} \neq 0 \ \& \ \text{n_children_6_14} \neq 0$
mpi_housing_dep	NITI: the floor is natural material, OR the roof OR the wall is rudimentary. All three limbs are now collected; the wall limb was previously missing entirely.	$\text{floor_material} == 1 \ \text{---} \ \text{roof_material} == 1 \ \text{---} \ \text{wall_material} == 1$
mpi_sanitation_dep	NITI: unimproved or no facility, OR improved but shared with other households.	$\text{inlist}(\text{toilet_type}, 1, 2, 3)$
mpi_electricity_dep	NITI: the household has no electricity.	$\text{electricity} == 0$
mpi_bank_dep	NITI: no household member has a bank account or a post office account.	$\text{has_bank_account} == 0$
mpi_score	Weighted sum of the ten collected indicators. Nutrition (1/6) cannot be collected without anthropometry, so the remaining weights are scaled up proportionally to sum to 1. REPORT THIS AS AN ADAPTATION, never as the National MPI – and state which indicator is absent.	$(1/12 * \text{mortality} + 1/12 * \text{maternal} + 1/6 * \text{schooling} + 1/6 * \text{attendance} + 1/21 * (\text{fuel} + \text{sanitation} + \text{water} + \text{electricity} + \text{housing} + \text{assets}) / (1 - 1/6)$
mpi_poor	Alkire-Foster identification at the standard $k = 33.3$ percent cutoff.	$\text{mpi_score} \leq 1/3$
rcsi_yatra_wk	Weighted sum of the five Yatra-season food-coping day-counts, standard WFP weights (1,2,1,1,3).	$\text{cope_less_pref_food_yatra_wk} + 2 * \text{cope_borrow_food_yatra_wk} + \text{cope_reduce_meals_yatra_wk} + \text{cope_reduce_portion_yatra_wk} + 3 * \text{cope_restrict_adult_yatra_wk}$

Variable	Meaning	How it is made
<code>rcsi_offseason_wk</code>	Weighted sum of the five off-season food-coping day-counts, standard WFP weights (1,2,1,1,3).	<code>cope_less_pref_food_offseason_wk</code> + <code>2*cope_borrow_food_offseason_wk</code> + <code>cope_reduce_meals_offseason_wk</code> + <code>cope_reduce_portion_offseason_wk</code> + <code>3*cope_restrict_adult_offseason_wk</code>
<code>rcsi_score</code>	Yatra-season and off-season weekly rCSI, weighted by the length of each season from the work calendar – the same weighting already used for income and consumption.	$(\text{yatra_months} * \text{rcsi_yatra_wk} + (12 - \text{yatra_months}) * \text{rcsi_offseason_wk}) / 12$
<code>food_coping_deprived</code>	1 if annual-average rCSI exceeds 20, the cutoff used by Lyons et al. 2023 (from VASyR).	<code>rcsi_score</code> $\geq$ 20
<code>hours_week_yatra</code>	Hours per day times days per week.	<code>hours_day_yatra</code> * <code>days_week_yatra</code>
<code>hours_week_offseason</code>	Hours per day times days per week, off-season. Missing for respondents with no off-season paid work at all.	<code>hours_day_offseason</code> * <code>days_week_offseason</code>
<code>hours_week_annual</code>	Yatra-season and off-season weekly hours, weighted by how many months of each the calendar records. Averaged over WORKED months only, so idle months do not drag the figure to zero – idleness is measured by <code>months_no_work</code> , and counting it here too would penalise it twice.	$(\text{yatra_months} * \text{hours_week_yatra} + \text{offseason_months_worked} * \text{hours_week_offseason}) / (\text{yatra_months} + \text{offseason_months_worked})$
<code>work_income_pm</code>	(Yatra income + other work income) divided by 12.	$(\text{yatra_income} + \text{non_yatra_income}) / 12$
<code>emp_dep_access</code>	1 if idle more than 6 months and spent any weeks looking for work, or wants more work while working under 20 hours a week in EITHER season. The under-20 limb previously tested Yatra-season hours only, where this workforce runs 60-90 hours a week, so it could never fire and the indicator collapsed onto its other limb.	$(\text{months_no_work} \geq 6 \ \& \ \text{weeks_looked_for_work} \geq 0) \ \& \ (\text{wants_more_work} == 1 \ \& \ (\text{hours_week_yatra} \geq 20 \ \& \ \text{hours_week_offseason} \geq 20))$
<code>emp_dep_comp</code>	1 if average monthly work income is below 67 percent of the sample median (the fallback threshold in Table 3).	<code>work_income_pm</code> $\leq$ 0.67 * <code>median(work_income_pm)</code>
<code>emp_dep_sec</code>	1 if a wage worker has no signed contract, or a self-employed worker's business is not registered.	<code>wage</code> : <code>contract_status</code> != 1; self-employed: <code>workplace_registered</code> == 0
<code>emp_dep_stab</code>	Apablaza Table 3 sets TWO tenure thresholds – wage workers deprived under 6 months, self-employed under 12 months – where this file previously applied a single under-1-year rule to everyone, which marked wage workers with 6 to 12 months of tenure as deprived when Table 3 would not. Tenure here is counted in Yatra SEASONS, and one season is roughly six months of work, so the two thresholds map cleanly onto under 1 season for wage workers and under 2 for the self-employed. The casual-job limb is an ADDITION to Table 3, whose fallback (temporary/casual) is meant for use only when tenure is unavailable; it is kept because occasional work is a real instability here, but note it covers code 3 only – code 2 (seasonal) would mark almost this entire sample deprived and would measure the season, not the job.	<code>wage</code> (<code>employment_type</code> 3/4): <code>years_in_yatra_work</code> $\geq$ 1; self-employed (1/2): <code>years_in_yatra_work</code> $\geq$ 2; OR <code>job_permanence</code> == 3
<code>emp_dep_cond</code>	1 if someone was injured or killed at the workplace in the last 12 months, or the worker has neither work health insurance nor a pension.	<code>workplace_injury_12m</code> == 1 OR $(\text{work_health_ins} == 3 \ \& \ \text{pension_contrib} == 3)$
<code>emp_dep_count</code>	Number of the five employment indicators in which the worker is deprived.	sum of the five <code>emp_dep_</code> indicators
<code>emp_dep_score</code>	Count divided by 5.	<code>emp_dep_count</code> / 5
<code>emp_poor_k2</code>	1 if two or more indicators; k = 2 of 5 is the project's choice, to be varied in robustness.	<code>emp_dep_count</code> $\geq$ 2
<code>tk_regular_n</code>	Count of task answers equal to 1.	<code>count</code> of <code>tk_*</code> == 1
<code>tk_prior_n</code>	Count of task answers equal to 2.	<code>count</code> of <code>tk_*</code> == 2
<code>other_act_1</code>	1 if 'Pony/mule worker (works the animals, does not own them)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 1
<code>other_act_2</code>	1 if 'Pony/mule owner (owns the animals)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 2
<code>other_act_3</code>	1 if 'Porter (carries on own back/shoulders - goods, luggage, or a person in a kandi)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 3
<code>other_act_4</code>	1 if 'Palki / dandi bearer (carries a person on a palanquin, as part of a team)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 4
<code>other_act_5</code>	1 if 'Dhaba, tea stall or food stall WORKER (prepared food or tea)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 5
<code>other_act_6</code>	1 if 'Dhaba, tea stall or food stall OWNER (prepared food or tea)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 6
<code>other_act_7</code>	1 if 'Shop WORKER (goods: prasad, puja items, clothes, general store)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 7
<code>other_act_8</code>	1 if 'Shop OWNER (goods, not prepared food)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 8
<code>other_act_9</code>	1 if 'Hotel / lodge WORKER' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 9
<code>other_act_10</code>	1 if 'Hotel / lodge OWNER' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 10
<code>other_act_11</code>	1 if 'Driver (any motor vehicle)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 11
<code>other_act_12</code>	1 if 'Guide' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 12
<code>other_act_13</code>	1 if 'Wage labourer (construction, loading, odd jobs)' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 13
<code>other_act_14</code>	1 if 'Other' was ticked in the check-all list of other paid activities.	<code>other_activity_types</code> contains 14

Variable	Meaning	How it is made
n_other_act_checked	Count of the boxes ticked in the check-all list. Compared against the respondent's own count (n_other_activities); a mismatch is a data-quality flag, not a silent loss.	sum of other_act_1..13
other_act_mismatch	1 if the number of activities ticked does not equal the number the respondent said they had. Expected to be small; if it is not, the item needs rewording before scale-up.	n_other_act_checked != n_other_activities
best_alt_occupation	Of the 13 occupations, the one (other than the respondent's own) whose task profile is closest to the respondent's. Worker's own task profile uses codes 1 AND 2 (does it now, or has done it before elsewhere) – prior capability outside the current job is exactly what a transfer question is about. Destination profiles are the occupation-level share of workers doing each task (Gathmann and Schonberg's q_oj).	argmax over j != own occupation of cosine(worker profile, q_j)
task_cover_best	Coverage: of the tasks that alternative occupation requires, the share this worker can already perform. Ormiston's t_ji direction – can the worker step in?	sum(q_best * worker) / sum(q_best)
task_retain_best	Retention: of the tasks this worker can perform, the share that alternative occupation would actually use. Ormiston's t_ij direction – how much of their skill survives the move?	sum(q_best * worker) / sum(worker)
skill_move_type	Direction of the move implied by the coverage/retention pair, both split at 0.5: high-high lateral (move needs little retraining); low coverage but high retention means the destination needs skills the worker lacks while their own still count, i.e. UPSKILLING; high coverage but low retention means the worker has more than the destination uses and much of it goes idle, i.e. DOWNSKILLING; low-low means the skill sets barely overlap, i.e. RESKILLING. Worker's own task profile uses codes 1 AND 2 (does it now, or has done it before elsewhere) – prior capability outside the current job is exactly what a transfer question is about. Destination profiles are the occupation-level share of workers doing each task (Gathmann and Schonberg's q_oj).	from (task_cover_best, task_retain_best), each split at 0.5

5. Apablaza et al. (2026) questions: what we asked, changed or dropped

Module K uses the questions in Appendix 2 of the paper. Their own skip logic is kept: wage workers only for the contract and leave questions; extra hours only if the worker wants more work; the search question only if some month had no work. The paper asks every household member aged 5 or more. We ask the respondent only (no household roster), so an employment index for the whole household cannot be built.

Apablaza question	Our variable	Note
Q1 household size; Q2 sex, age Q3 disability	hhsz, female, age not asked	Module A Respondents are working; not needed for the five domains
Q4 birthplace, main earner Q5 situation last month Q6 occupation (open)	origin, n_earners job_situation occupation	Modules A and D Shortened to categories that fit a working respondent Card with 13 groups (the quota variable), not an open answer
Q7 activity of the workplace Q8 status in the job	not asked employment_type	Implied by the occupation group PLFS four-way status instead of the paper's seven categories
Q9 permanent / seasonal / casual Q10 years in this job Q11 signed contract Q12 registered workplace	job_permanence years_in_yatra_work contract_status workplace_registered	Probation and fixed-term merged Whole years, so a test for under 6 months is not possible Wage workers only Widened to local registrations (union, Yatra registration, trade licence, GST)
Q13 hours in a normal week Q14 monthly earnings Q15 earnings range if unknown	hours_day_yatra, days_week_yatra income_m1 to income_m12 not asked	Two easier questions, multiplied afterwards Asked month by month (section 6) Amounts are asked for every month, so no range is needed
Q16 pension Q17 health insurance through work Q18 leave rights Q19 ever injured; Q20 injury or death at workplace, last 12 months Q21 wants more work; Q22 how many hours Q23 weeks looking for work Q24 first job; Q25 why lost the last job	pension_contrib work_health_ins leave_rights injured_ever, workplace_injury_12m wants_more_work, more_hours_week looked_for_work_idle not asked	As in the paper As in the paper Wage workers only The paper's evidence on hazards As in the paper Tied to the months with no work in the calendar Apply to the unemployed only; prev_occ_reason covers job changes

The five deprivation indicators (access, compensation, security, stability, working conditions) are built from these raw answers in Stata, using the thresholds in Table 3 of the paper. Where the paper gives a choice, the fallback

is used for pay (67 percent of the median) because the international-dollar version needs a conversion factor we have not verified.

6. What changed from the earlier draft, and why

- **The 12-month calendar is back.** The worker gives the main activity for each month and the earnings for each month with work. Earnings are asked month by month, so that a single typical figure is not rounded (heaping) and monthly earnings are not guessed from an annual total. Because it is the original design, the constructed income, the months of work and the seasonality measure now reproduce the earlier pipeline exactly. Months with no work are filled with 0 by the tablet, so the calendar costs about 4.5 minutes.
- **Licences and certificates are gone.** People drive, wire and guide without holding a licence, so holding one says little about what they can do. The block asks what people do (the three-answer grid) and adds three factual driving questions, asked only of those who have driven: motorcycle, car, truck or bus, with or without a licence. Entry papers can be studied in the second paper if needed.
- **The consumption module now asks a Yatra-season figure AND an off-season figure for every routine item** (9 pairs: staples, perishables, home-grown/gifted food, eating out, fuel, toiletries, transport/communication, rent, non-hospital medical), instead of one “last 30 days” figure. Workers here are migrants: fieldwork happens during the Yatra season, so a single recent-recall question would describe only the season the interview happens to fall in, not the whole year. The item groupings and which items get a long (365-day) recall instead still follow HCES 2022-23, IHDS-II and the Nigeria GHS-Panel (read directly; see section 8).
- **Remittances are split the same way** (Module C): a usual monthly amount sent and received, for the Yatra season and for the off-season, instead of one annual figure.
- **The annual welfare measure is now a genuine annual average**, not an on-season snapshot: each seasonal item is weighted by the number of Yatra-season months and off-season months from the work calendar, exactly as income already was. In the test data this moves `cons_pc.pm` down and the poverty rate up, because the earlier design implicitly treated on-season spending as if it held all year; see the note in `checks/check_report.txt`.
- **Two new consumption variables for robustness:** a narrow measure (30-day items only, as in Dercon and Krishnan 2000) and a per-adult-equivalent measure (needs the count of children under 15, now asked).
- **Four opinion questions on a 1 to 5 scale were removed**, in line with the no-rating rule. Only the three-way ropeway view remains.
- **Dropped for length:** remittance frequency and `prev_offseason_work`. The season start, end and length, and the main off-season activity, are now built from the calendar instead of being asked.
- **Added:** sex, native language, earners, children under 15 and school-age children, the way the household coped with a shock, direct exposure to the trek, and the Apablaza questions.
- **Food security and disability are new** (Modules H and I): a long-term illness/disability flag and an unmet-healthcare-need question (VASyR 2025 / Washington Group short set), plus the standard WFP reduced Coping Strategy Index. This was a genuine gap: a vulnerability-to-poverty instrument with no food-security module. Modelled on the VASyR/Lyons, Kass-Hanna and Montoya Castano (2023) multidimensional livelihood index, read directly (see `replication/vasyr_example/`); a full dietary-diversity count was left out to stay inside the 45-minute limit.
- **The rCSI is a Yatra-season/off-season pair, like the consumption module:** the first version asked each of the five WFP coping items once, over “the last 7 days” – fieldwork happens during the Yatra season, so that could only describe on-site coping at the work site, not the household’s usual pattern (which may look different off-season, with different members present). Each item is now asked as a usual-week day-count for each season, combined into an annual-average rCSI the same way income and consumption already are.
- **Household-head and family-structure items are new** (Module A): relationship to the household head and the head’s sex (auto-filled with the respondent’s own sex when they are the head), and whether the family is nuclear, joint or single-member. `hhsiz` is now asked as household membership directly (“how many members live in your household”) rather than through a shared-kitchen framing.
- **A direct residence-migration question is new** (Module D): apart from the seasonal Yatra-work absence, whether the respondent’s usual place of residence for most of the year differs from their family’s native/home place – distinct from `origin` (where they are originally from) and from the NSS short-term-migrant item (a specific 15-day-to-6-month absence threshold). Asked only of non-local-origin respondents.

- **The interview site is no longer named.** `location_cluster` now has generic labels (Cluster 1-4) instead of the actual place names: enumerators read the site off a printed crosswalk card kept by the research team, not a name on the tablet, so no exported record carries a named interview site. The underlying codes and the health-access-tier logic built from them are unchanged. On the Kobo build (`questionnaire/build_xlsform.py`), the enumerator-name question is dropped the same way – each enumerator has their own Kobo login, which records who submitted automatically – and GPS is captured silently in the background the moment consent is given, with no on-screen question.
- **Tasks block: 12 tasks** (from 27), the ones the provisional destination jobs need most. They fully cover 7 of the 13 destination jobs. The task-transfer paper will need a longer list and employer information.
- **Field team is 4 enumerators** in the worked example (the earlier file used 6).

7. Points still open

- **Timing is untested.** The 12-month calendar and the 25-question Apablaza set are the two blocks most likely to run over their estimate. Time them in the pretest.
- **The working-conditions indicator is high in the test data** (64 in 100 deprived). It is driven by the social-protection route: almost nobody has a pension and most have no health insurance through work. That may well be true of Yatra workers, but check it against the pilot before treating it as a finding. The cut-off of 2 of 5 gives 64 in 100 employment-poor; a cut-off of 3 gives 26.
- **Tenure is asked in whole years**, so the paper’s under-6-month test for wage workers is not possible; casual jobs supply the variation instead.
- **Real quotas.** Occupation quotas must be reset against a real enumeration before fieldwork.

8. The consumption module, read against the three source questionnaires

Most of the vulnerability-to-poverty papers in the project folder use an existing national survey and report only how consumption was totalled, not the question list itself. So the three questionnaires were read directly: **HCES 2022-23** (MoSPI, Appendix A: the source of our poverty line), **IHDS-II** (the Income and Social Capital Questionnaire, question 14), and the **Nigeria GHS-Panel** (Wave 3 Household Questionnaire, Sections 10B and 11, the survey behind Eze and Iheonu 2025).

8.1 What each source does

Source	Recall design
HCES 2022-23 (India)	A ‘modified mixed reference period’: 30 days for cereals, pulses, sugar and salt (Sections 5.1-5.3); 7 days for milk, vegetables, fruit, meat/fish/egg, oil, spices and processed food eaten out (Sections 6-7); 30 days for fuel, toiletries, conveyance, phone and rent (Sections 8-11); 365 days for clothing, footwear, education, hospitalisation and durables (Sections 10, 13-14); 30 days for non-hospitalisation medical (Section 10.3). Insurance is not part of consumption.
IHDS-II (India)	A flatter design: 30 days for all 33 food and routine items together (questions 14.1-14.33, including phone, transport and non-hospitalisation medical); 365 days for 19 further items (14.34-14.52: hospitalisation, education, clothing, footwear, durables, and also insurance premiums and vacations, which it counts as consumption).
Nigeria GHS-Panel Wave 3	Four recall tiers: 7 days for food and a short non-food list (tobacco, newspapers, transport); 30 days for fuel, electricity, toiletries, phone/internet, rent; 6 months for clothing, footwear and small household items (shorter than the two India surveys); 12 months for durables, insurance and ceremonies.

8.2 Where the three sources agree, and where they do not

- **All three agree on 30 days** for fuel and light, toiletries and household consumables, transport and phone charges, and rent.
- **All three agree on 12 months** for durable goods (furniture, utensils, appliances).
- **HCES and IHDS-II agree exactly** on splitting medical spending into non-hospitalisation (30 days) and hospitalisation (365 days), and on 365 days for clothing, footwear and education. The Nigeria survey instead asks one combined 6-month medical item, and 6 months (not 12) for clothing.

- **HCES and IHDS-II disagree on food.** HCES uses 7 days for perishables (milk, vegetables, fruit, meat, oil, spices) to limit recall decay on frequent purchases; IHDS-II asks the same items at 30 days, in one simpler module. The Nigeria survey uses 7 days for all food.
- **Only IHDS-II and the Nigeria survey treat insurance premiums as consumption.** HCES does not, which matches standard national-accounts practice (insurance is a financial item). We follow HCES: our insurance question sits in Module G, not in the consumption total.
- **HCES and IHDS-II record the source of each food item** (purchased, home-grown, gift) as a column against every single item. That needs far more interview time than we have, so, following Calvo and Dercon (2007) and Eze and Iheonu (2025), home-grown and gifted food is asked as one aggregate question instead.

8.3 Our final choice, and why

We follow **HCES 2022-23** for which items get a short recall and which get a 365-day recall (staples, fuel, toiletries, transport, rent and non-hospital medical at a routine recall; clothing, education, hospital and durables at 365 days), because HCES is also the source of our poverty line (Sethu et al. 2024). Within the routine group we do not copy HCES’s actual-recall design (its 7-day window for perishables, versus 30 days for staples): our workers are migrants, so the bigger source of error is location and season, not recall decay on one item. Every routine item is instead asked as a usual monthly amount, once for the Yatra season and once for the off-season (section 6), which a single actual-recall question cannot give. Every item in Module E of this questionnaire (section 3) carries its exact source citation.

8.4 Other papers in the folder

Source	Consumption measure	Use in our list
Calvo and Dercon 2007 (Ethiopia)	Total value of food and non-food consumption, from purchases, own harvest and gifts.	Source for asking home-grown and gifted food as one aggregate question.
Dercon and Krishnan 2000 (Ethiopia)	Monthly consumption: food plus a deliberately narrow non-food list, to avoid seasonal swings from large expenditures.	Source of the narrow (30-day only) consumption measure kept as a robustness check.
Azeem et al. 2016 (Punjab, MICS)	Quantities of foods consumed and monetary non-food spending, valued at weekly prices.	We ask values, not quantities, to keep the interview short.
Azeem et al. 2018 (Pakistan); Awuni et al. 2023 (Ghana)	Food intake converted to an adult-equivalent basis (Claro et al. 2010 scale).	Source of the adult-equivalent consumption measure kept as a robustness check; needs the count of children under 15.
Lyons et al. 2023 (VASyR, Lebanon)	A short expenditure module (food total, rent, water, income) run at national scale.	Shows a short module of this kind can work in the field.
Khosla and Jena 2022; Jha et al. 2018 (rural India, using IHDS/NSS)	Monthly per capita consumption expenditure; item list not given in the paper (the source survey was read directly instead).	Confirms the outcome variable is per-capita monthly consumption.
Ding 2022; Wei et al. 2023; Ceesay and Morelli 2026	Income-based, or income and consumption used interchangeably, in small samples.	Not comparable; we keep consumption, not income, as the welfare measure.
Zheng and Ma 2023 (China, CLES)	Ten food groups counted over the reference week, for dietary diversity, not value.	Not used; our aim is a value-based poverty line, not a diet-diversity score.

9. Code lists

List	Codes
yn	0 No; 1 Yes
sex	0 Male; 1 Female
enum	1 Raman; 2 Rishit; 3 Tanmay; 4 Anuj
nativelang	1 Garhwali; 2 Kumaoni; 3 Hindi; 4 Nepali; 5 Bhojpuri; 6 Assamese; 7 Bengali; 8 Bodo; 9 Dogri; 10 Gujarati; 11 Kannada; 12 Kashmiri; 13 Konkani; 14 Maithili; 15 Malayalam; 16 Manipuri (Meitei); 17 Marathi; 18 Odia; 19 Punjabi; 20 Sanskrit; 21 Santali; 22 Sindhi; 23 Tamil; 24 Telugu; 25 Urdu; 96 Other Indian language; 97 Other / foreign language
state	1 Andhra Pradesh; 2 Arunachal Pradesh; 3 Assam; 4 Bihar; 5 Chhattisgarh; 6 Goa; 7 Gujarat; 8 Haryana; 9 Himachal Pradesh; 10 Jharkhand; 11 Karnataka; 12 Kerala; 13 Madhya Pradesh; 14 Maharashtra; 15 Manipur; 16 Meghalaya; 17 Mizoram; 18 Nagaland; 19 Odisha; 20 Punjab; 21 Rajasthan; 22 Sikkim; 23 Tamil Nadu; 24 Telangana; 25 Tripura; 26 Uttar Pradesh; 27 Uttarakhand; 28 West Bengal; 29 Andaman and Nicobar Islands; 30 Chandigarh; 31 Dadra and Nagar Haveli and Daman and Diu; 32 Delhi; 33 Jammu and Kashmir; 34 Ladakh; 35 Lakshadweep; 36 Puducherry; 99 Outside India
ruralurban	1 Village (rural); 2 Town or city (urban)
collat	1 Jewellery or ornaments; 2 Land; 3 Animals; 4 A vehicle; 5 Shop stock or business goods; 6 House or building; 7 Something else
recall	1 Month by month; 0 One total for the whole year
hohrel	1 Self (respondent is the head); 2 Husband; 3 Wife; 4 Father; 5 Mother; 6 Son; 7 Daughter; 8 Brother; 9 Sister; 10 Other male relative; 11 Other female relative; 12 Other, non-relative (male); 13 Other, non-relative (female)

List	Codes
famstruct	1 Nuclear (you, spouse and unmarried children only); 2 Joint (living with parents, married siblings or other extended family); 3 Single-member household
marital	1 Currently married; 2 Never married; 3 Widowed/divorced/separated
edu2	1 No formal education; 2 Some schooling, did not complete primary; 3 Completed primary but not secondary; 4 Completed secondary or higher; 98 Prefer not to say
occ	1 Pony/mule worker (works the animals, does not own them); 2 Pony/mule owner (owns the animals); 3 Porter (carries on own back/shoulders - goods, luggage, or a person in a kandi); 4 Palki / dandi bearer (carries a person on a palanquin, as part of a team); 5 Dhaba, tea stall or food stall WORKER (prepared food or tea); 6 Dhaba, tea stall or food stall OWNER (prepared food or tea); 7 Shop WORKER (goods: prasads, puja items, clothes, general store); 8 Shop OWNER (goods, not prepared food); 9 Hotel / lodge WORKER; 10 Hotel / lodge OWNER; 11 Driver (any motor vehicle); 12 Guide; 13 Wage labourer (construction, loading, odd jobs); 14 Other
emptytype	1 Own-account (self-employed, no hired workers); 2 Employer/business owner (self-employed); 3 Regular wage or salary; 4 Casual or daily wage labour; 5 Unpaid family worker
site	1 Kedarnath (Gaurikund to Kedarnath); 2 Hemkund Sahib (Govindghat to Hemkund)
accomhere	1 Own house here; 2 Rented room or house; 3 Room or dormitory the employer provides; 4 Sleeps at the shop, dhaba or workplace; 5 Tent or temporary shelter; 6 Lodge, dharamshala or ashram; 7 In the open, or a verandah; 8 Somewhere else
wgdiff	1 No difficulty; 2 Some difficulty; 3 A lot of difficulty; 4 Cannot do it at all
portable	1 Yes, can draw it here; 2 No, only at the home place; 3 Has never tried; 97 Does not know
month	1 January; 2 February; 3 March; 4 April; 5 May; 6 June; 7 July; 8 August; 9 September; 10 October; 11 November; 12 December
prevreason	1 Better income; 2 Lost the previous work; 3 Work ended with the season; 4 Family reasons; 5 Health or injury; 6 Other
trtype	1 ITI or other trade course; 2 Hotel, catering or tourism; 3 Driving; 4 Mobile, computer or electrical repair; 5 Tailoring or handicraft; 6 Animal handling or veterinary; 7 Construction trade (mason, carpenter, plumber); 8 Health or first aid; 9 Other
origin	1 Local (same district); 2 Other Uttarakhand district; 3 Other Indian state; 4 Nepal
referral	1 A family member already working here; 2 A friend or someone from the village; 3 A thekedar or contractor I now work for; 4 An agent or middleman who placed me (usually for a fee); 5 No one; I found it myself; 6 The employer called me directly; 7 Someone else
floor	1 Mud/kaccha; 2 Cement/mud-cement; 3 Tile/mosaic/marble
roof	1 Thatch/wood/mud; 2 Tin/GI sheet; 3 Concrete/RCC
house	1 Kaccha; 2 Semi-pucca; 3 Pucca
wall	1 Mud, thatch, bamboo or other natural material; 2 Unburnt brick, wood or tin; 3 Burnt brick, cement, concrete or stone
toilet	1 No toilet / open defecation; 2 Pit latrine without slab or open pit; 3 Improved toilet, but shared with other households; 4 Improved toilet, used only by this household
water	1 Piped into the house or yard; 2 Public tap or standpipe; 3 Handpump, tubewell or borewell; 4 Protected well or protected spring; 5 Rainwater collection; 6 Bottled, packaged or community RO; 7 Unprotected well or unprotected spring; 8 River, stream, pond or canal; 9 Tanker truck or cart with drum
fuel	1 LPG or cylinder gas; 2 Piped natural gas; 3 Electricity; 4 Biogas (gobar gas plant); 5 Kerosene; 6 Firewood; 7 Dung cakes (gobar); 8 Crop residue, straw or shrubs; 9 Charcoal; 10 Coal or lignite
fetcher	1 An adult woman; 2 An adult man; 3 A girl under 15; 4 A boy under 15; 5 It varies / more than one person
comereason	1 No work at home; 2 Pay is better here; 3 Family or people from my village were already here; 4 Land at home is too little to live on; 5 Debt to repay; 6 A contractor or agent brought me; 7 Married into / moved with family; 8 Some other reason
govtscheme	1 Ration card / PDS food grain; 2 MGNREGA work or job card; 3 Old-age, widow or disability pension; 4 PM-KISAN (farmer cash transfer); 5 Ujjwala LPG connection; 6 PM-SYM or Atal Pension Yojana; 7 Ayushman Bharat / health insurance card; 8 Housing scheme (PMAY or state); 9 Some other scheme; 10 None of these
remittance	1 From my own phone (UPI or net banking); 2 In person at a bank branch or bank mitra / CSP; 3 Money order or post office; 4 Sent with someone going home; 5 Carried it myself; 6 Through an agent or middleman; 7 Other
credit	1 Nationalised or public-sector bank; 2 Private bank; 3 Cooperative bank or RRB; 4 Microfinance institution or SHG; 5 Moneylender; 6 Relative or friend; 7 Employer or contractor (advance); 8 Other
distress	1 Serious illness or death of an earning member; 2 Crop failure or livestock loss; 3 Damage from a natural disaster (flood, landslide, fire); 4 Loss of business, goods or assets; 5 Road or bridge blocked, route closed; 6 Yatra stopped early or badly disrupted; 7 Sharp fall in customers or prices; 8 Lost the work or the work stopped
coping	1 Used savings; 2 Borrowed money; 3 Sold or pawned assets; 4 Cut consumption; 5 Help from relatives/community; 6 Did nothing/other
stance	1 Support; 2 Neutral; 3 Oppose; 98 Prefer not to say
task3	1 Yes, regularly in my main Yatra work; 2 Not in my main work, but done before elsewhere; 3 Never done
tier	1 Poor; 2 Moderate; 3 Good
activity	1 Yatra work, or getting ready for the season; 2 Farming (crops); 3 Livestock (animals); 4 Casual or daily wage labour; 5 Construction work; 6 Own small shop, stall or trade; 7 Salaried job; 8 No paid work
yndk	0 No; 1 Yes; 97 Don't know
jobsit	1 Works for pay full-time; 2 Works for pay part-time or occasional jobs; 3 Studies and works; 4 Only studies; 5 Being trained for work only; 6 Retired or pensioned; 7 Unpaid household tasks or caring for others; 8 Unemployed, actively seeking work; 9 Sick or disabled, cannot work; 10 Neither studying, working nor seeking work; 97 Does not know
jobperm	1 Permanent; 2 Seasonal or temporary; 3 Occasional or casual; 4 On probation; 5 Fixed-term
contract	1 Yes, signed; 2 Yes, but not yet signed; 3 No contract
pension	1 Yes, employer deducts it; 2 Yes, contributes voluntarily; 3 No
workins	1 Yes, through work; 2 Only private or other insurance; 3 None; 4 Don't know
movetype	1 Lateral (little retraining needed); 2 Upskilling (destination needs skills the worker lacks); 3 Reskilling (skill sets barely overlap); 4 Downskilling (worker's skills would go unused)
